Detailed Scheme

ACADEMIC YEAR 2020-2021

Dr. Ambedkar Institute of Technology Bangalore

III - IV (2019-2023 BATCH) (175 Credits)

B.E

Department Of Information Science and Engineering

Vision

• To create Dynamic, Resourceful, Adept and Innovative Technical professionals to meet global challenges.

Mission

- To offer state-of-the-art undergraduate, postgraduate and doctoral programmes in the fields of Engineering, Technology and Management.
- To generate new knowledge by engaging faculty and students in research, development and innovation
- To provide strong theoretical foundation to the students, supported by extensive practical training to meet industry requirements.
- To install moral and ethical values with social and professional commitment.

DEPARTMENT VISION AND MISSION

Vision:

• Imparting quality technical education and preparing professionals to meet Information Technological challenges globally.

Mission:

- Prepare highly capable Information Science engineers through best practices.
- Encourage students to pursue higher education for further growth in the learning process and to promote research in the frontier areas of Information Technology.
- Educate students to take up social and professional responsibilities with ethical values for the betterment of the society.

PROGRAMME EDUCATIONAL OBJECTIVES (PEOS)

PEO1: Graduates will have the ability to become successful computing professionals in the area of Information Science and Engineering.

PEO2: Graduates will be equipped to enhance their knowledge through core engineering and latest technological skills to promote lifelong learning.

PEO3: Graduates will be able to take up social, technical and entrepreneurial challenges in inter disciplinary and multi disciplinary fields.

PROGRAM SPECIFIC OBJECTIVES(PSOS)

PSO1:Students should be able to understand, analyze and adopt principles of programming paradigms by using latest technologies such as Cloud computing, Big data analytics, AI ,Machine Learning and IoT based applications for solving real-world problems.

PSO2:Students should be able to acquire and demonstrate the team work, professional ethics, competence and communication skills while developing software products.

PROGRAMME OUTCOMES (POs)

1. Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

2. Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

3. Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

4. Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

5. Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

6. The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

7. Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

8. Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

9. Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

10. Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

11. Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

12. Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change

Note: HODs are informed to accommodate one more laboratory in addition to the above courses if needed, without altering the total number of credits (TOTAL: 24).

(a) The mandatory non – credit courses Advance Mathematics I and II prescribed at III and IV semesters respectively, to lateral entrant Diploma holders admitted to III semester of BE programs shall compulsorily be registered during respective semesters to complete all the formalities of the course and appear for SEE examination.

(b) The mandatory non – credit courses Advance Mathematics I and II, prescribed to lateral entrant Diploma holders admitted to III semester of BE programs, are to be completed to secure eligibility to VII semester. However, they are not considered for vertical progression from II year to III year of the programme but considered as head of passing along with credit courses of the programme to eligibility to VII semester.

Note: BC: Science Course, PC: Professional Core. Hu: Humanities, MC: Mandatory Course.

HEAD DEPT. OF INFORMATION SCIENCE & ENGG

III SEMESTER

For THIRD Semester B E (For CS/IS branch only)

| INSTITUTE OF | SUBJECT T | TTLE: DISCRETE MATHEMATICS METHODS | 5 & N | UMERIC | CAL | |
|--------------|--|--|---------------------------------------|---|----------|--|
| | Subject Code : 18MA31CS/ISNumber of Credits: 3 = 2 : 1 : 0 (L : T : P)No per | | | of lecture hours r week: 04 =2+T=2) | | |
| | Exam Duration: 3 Hrs | Exam Marks: CIE +Assignment + Group Activity+ SEE = 40 + 5 +5+ 50 = 100 | Tota hou | al No. of l rs: 39 | ecture | |
| | Course objectives: To enhance the student's ability to think logically, mathematically and algorithmically many basic computer related concepts and provide a coherent development in the field of Discrete Structures and Numerical methods. | | | | | |
| Unit No. | | Syllabus Content | | No. of | f hours | |
| | | | | Theory | Tutorial | |
| 1 | Logics and Quantifiers: Basic Connectives and Truth Tables, Logic equivalence – The Laws of Logic, Logical Implication – Rules of Inference.0502 | | | | | |
| 2 | Lattices and Boolean Algebra: Relation and ordering, partially ordered sets, Lattices as poset, properties of lattices, complete lattices, bounds of lattices, distributive lattice and complemented lattices. | | | | | |
| 3 | Groups: Binary algebra, Semigroups and monoids, Groups, Examples and Elementary Properties, Subgroups, Homomorphisms, Isomorphisms, and Cyclic Groups, Cosets, and Lagrange's Theorem. | | | | 02 | |
| 4 | Solutions of algebraic and transcendental equations:0602Regula-Falsi method and Newton-Raphson method.Interpolation: Interpolation using Newton's forward and backward difference formulae. Interpolation with unequal intervals: Newton's divided difference and Lagrange's formulae.0602 | | | 02 | | |
| 5 | Numerical differ ODE'S: Numerica and backward dif Simpson's 1/3 rd , 3 first ODE's: Eule order method, Milr | entiation, integration and solutions al differentiation using Newton's forv ference formulae. Numerical Integrat /8 th rules and Weddle's rule. Solution r's modified method, Runge-Kutta fo ne's and Adams Bashforth methods. | s of vard tion: s of urth | 06 | 02 | |

Course Outcomes: After the successful completion of the course the students are able to: CO1: Demonstrate understanding of how to read and annotate an outline of a proof and able to write a logical poof of a statement.

CO2: Create rigorous mathematical arguments to logical gates and develop an algorithm.

CO3: Apply algebraic structures in codes in cryptography.

CO4: Compare the viability of different approaches to the numerical solution of problems arising in finding roots of equations, interpolation and approximation, numerical differentiation and integration, and solution of ODE's.

CO5: Develop a variety of numerical algorithms using appropriate technology/programming languages.

Course Outcomes (CO) Mapping with Programme Outcomes (PO)

CO1: PO1, PO2 CO2: PO1, PO2 CO3: PO1, PO2 CO4: PO1, PO2 CO5: PO1, PO2,PO4

TEXTBOOKS:

1. Ralph P. Grimaldi: Discrete and Combinatorial Mathematics, 5th Edition, Pearson Education, 2004.

2. J. P. Tremblay and R. Manohar, Discrete Mathematical Structures with Applications to Computer Science", ,Tata McGraw-Hill

3. B.S. Grewal, Higher Engineering Mathematics (Latest Edition, 2016), Khanna Publishers, New Delhi

REFERENCE BOOKS/Web sources:

1. Kenneth H. Rosen: Discrete Mathematics and its Applications, 6th Edition, McGraw Hill, 2007.

2. D.S. Malik and M.K.Sen: Discrete Mathematical Structures: Theory and Applications, Thomson, 2004.

3. H.K.Dass and Er. RajnishVerma, Advanced Engineering Mathematics (Latest Edn, 2015), S.Chand Publisher, New Delhi.

4. Dennis G Zill, MihaelGulle, Advanced Engineering Mathematics (2ndEdn), CBS publishers.

5. N.P.Balli and Manish Goyal, A text book of Engineering Mathematics, Lakshmi PublicationsYork.

QUESTION PAPER PATTERN:

The Semester End Examination (SEE) is for 100 marks.

1. There shall be five full questions (one question for each unit) carrying 20 marks each and all are

Compulsory.

2. There shall be internal choice in all the Units.

Note: Three assignments are evaluated for 5 marks.

| Sub Title : COMPUTER ORGANIZATION AND ARCHITECTURE | | | | | |
|--|---|------------------------------------|--|--|--|
| Sub Code: 18IS31 | No. of Credits:4=4: 0 : 0 (L-T-P) | No.of Lecture Hours/Week: 4 | | | |
| Exam Duration : 3 hours | Exam Marks: CIE +Assignment + Group Activity + SEE = 40 + 5 +5+ 50 =100 | Total No. of Contact Hours : 52 | | | |

Course Objectives:

- 1. Presents the basic structure and operation of a digital computer.
- 2. To understand the basics of assembly language.
- 3. Implement assembly programs that accomplish basic computational and I/O operations.
- 4. Acquire knowledge of semiconductor memories, cache memory and virtual memory.
- 5. Analyze the concepts of CPU Bus structures and Pipelining.

| UNIT | Syllabus Content | No of |
|------|---|-------|
| No | | Hours |
| 1 | Basic Structure of Computers: Computer Types, Functional Units, Basic Operational Concepts, Bus Structures, Performance – Processor Clock, Basic Performance Equation, Pipelining and Superscalar Operation, Clock Rate, Instruction Set:CISC and RISC, Performance Measurement. | 12 |
| | Numbers, Arithmetic Operations and Characters, Memory Location and Addresses, Memory Operations, Instructions and Instruction Sequencing, Addressing Modes, Assembly Language. T 1:Ch 1-1.1,1.2,1.3,1.4,1.6(1.6.1,1.6.2,1.6.3,1.6.4,1.6.5,1.6.7) Ch 2-2.1,2.2,2.3,2.4,2.5,2.6 | |
| 2 | Input / Output Organization: Accessing I/O Devices, Interrupts – Interrupt Hardware, Enabling and Disabling Interrupts, Handling Multiple Devices, Controlling Device Requests, Exceptions, Direct Memory Access, Buses, Interface Circuits, Standard I/O Interfaces – PCI Bus, SCSI Bus, USB. T1: Ch – 4.1, 4.2 (4.2.1 to 4.2.5), 4.4, 4.5, 4.6, 4.7 | 10 |
| 3 | Memory System: Basic Concepts, Semiconductor RAM Memories, Read Only Memories, Speed, Size, and Cost, Cache Memories – Mapping Functions, Replacement Algorithms, Performance Considerations, Virtual Memories, Secondary Storage. T1: Ch 5 – 5.1 to 5.7, 5.9. | 10 |
| 4 | Arithmetic: Numbers, Arithmetic Operations and Characters, Addition and Subtraction of Signed Numbers, Design of Fast Adders, Multiplication of Positive Numbers, Signed Operand Multiplication, Fast Multiplication, | 10 |

| | Integer Division, Floating-point Numbers and Operations. | |
|---|--|----|
| | T1 : Ch 6 – 6.1 to 6.7 | |
| 5 | Basic Processing Unit: Some Fundamental Concepts, Execution of a | 10 |
| | Complete Instruction, Multiple Bus Organization, Hard-wired Control, | |
| | Micro programmed Control. Pipelining, Embedded Systems and Large | |
| | Computer Systems: Basic Concepts of pipelining, Examples of Embedded | |
| | Systems, Processor chips for embedded applications, Simple | |
| | Microcontroller. | |
| | T1: Ch 7, Ch 8 – 8.1, Ch 9 – 9.1, 9.2, 9.3 | |

Note 1: All units will have internal choice

Note 2: Three Assignments are evaluated for 5 marks: Assignment – I from Units 1 and 2. Assignment – II from Units 3 and 4 Assignment -III from Unit 5

Course Outcomes:

After the completion of the course students will be able to

CO1: Analyze functional units of a computer, its operational concepts, addressing modes, internal organization of a system through practicing with an assembly language

CO2: Analyze and design I/O devices, interrupts and I/O interfaces.

CO3: Analyze and design of memory unit including SRAM, DRAM, cache mapping techniques and basics of virtual memory.

CO4:Design basic processing unit and implement execution of complete instruction.

CO5:Implement basic and intermediate concepts of pipelining.

| Sub Title : DATA STRUCTURES WITH C | | | | | | |
|------------------------------------|---|------------------------------------|--|--|--|--|
| Sub Code: 18IS32 | No. of Credits:4=4: 0 : 0 (L-T-P) | No.of Lecture Hours/Week: 4 | | | | |
| Exam Duration : 3 hours | Exam Marks: CIE +Assignment + Group Activity + SEE = 40 + 5 +5+ 50 =100 | Total No. of Contact Hours : 52 | | | | |

Course Objectives:

1. To become familiar with the concept of pointers and its usage in dynamic memory allocation.

2. To study and understand the representation and implementation of linear data structures.

3. To classify and comprehend the consequences of using non linear data structures in implementing a system .

4. To identify the suitable data structure during application development

5. To gain knowledge of sorting, searching and hashing techniques .

| UNIT | Syllabus Content | No of |
|------|--|-------|
| No | | Hours |
| 1 | Introduction: Data Structures, Classifications (Primitive & Non Primitive), Data structure Operations, Review of Arrays, Structures, Self-Referential Structures, and Unions. Pointers and Dynamic Memory Allocation Functions. Representation of Linear Arrays in Memory, Dynamically allocated arrays. Array Operations: Traversing, inserting, deleting, searching, and sorting. Multidimensional Arrays, Polynomials and Sparse Matrices. Strings: Basic Terminology, Storing, Operations and Pattern Matching algorithms. Programming Examples. | 12 |
| | T 1: Ch 1: 1.2, Ch 2: 2.2 - 2.7 T 2: Ch 1: 1.1 - 1.4, Ch 3 : 3.1 - 3.3, 3.5, 3.7, Ch 4: 4.1 - 4.9, 4.14 R3: Ch 1: 1.4 | |
| 2 | Stacks: Definition, Stack Operations, Array Representation of Stacks, Stacks using Dynamic Arrays, Stack Applications: Polish notation, Infix to postfix conversion, evaluation of postfix expression. Recursion - Factorial, GCD, Fibonacci Sequence, Tower of Hanoi, Ackerman's function. Queues: Definition, Array Representation, Queue Operations, Circular Queues, Circular queues using Dynamic arrays, Dequeues, Priority Queues, A Mazing Problem. Multiple Stacks and Queues. Programming Examples. T 1: Ch 3: 31-37 T 2: Ch 6: 61-63 65 67-610 612 613 | 10 |
| | 1 1: Un 3: 5.1 - 5.7 T 2: Un 6: 6.1 - 6.3, 6.5, 6.7 - 6.10, 6.12, 6.13 | |

| 3 | Linked Lists: Definition, Representation of linked lists in Memory, Memory | 10 |
|---|---|----|
| | allocation; Garbage Collection. Linked list operations: Traversing, Searching, | |
| | Insertion, and Deletion. Doubly Linked lists, Circular linked lists, and header | |
| | linked lists. Linked Stacks and Queues. | |
| | Applications of Linked lists – Polynomials, Sparse matrix representation. | |
| | Programming Examples. | |
| | T 1: Ch 4: 4.1 – 4.6, 4.8 T 2: Ch 5: 5.1 – 5.10 | |
| 4 | Trees: Terminology, Binary Trees, Properties of Binary trees, Array and | 10 |
| | linked Representation of Binary Trees, Binary Tree Traversals - Inorder, | |
| | postorder, preorder; Additional Binary tree operations, Threaded binary | |
| | trees, Binary Search Trees – Definition, Insertion, Deletion, Traversal, | |
| | Searching, Application of Trees-Evaluation of Expression, Programming | |
| | Examples, AVL Trees, AVL rotations, overview of Red Black trees and | |
| | Tournament Trees | |
| | T 1: Ch 5.1 –5.5, 5.7 T 2: Ch 7: 7.1 – 7.9 | |
| 5 | Graphs: Definitions, Terminologies, Matrix and Adjacency List | 10 |
| | Representation Of Graphs, Elementary Graph operations, Traversal methods: | |
| | Breadth First Search and Depth First Search. | |
| | Sorting and Searching: Insertion Sort, Radix sort, Address Calculation Sort. | |
| | Sorting and Searching: Insertion Sort, Radix sort, Address Calculation | |
| | Sort. | |
| | Hashing: Hash Table organizations, Hashing Functions, Static and Dynamic | |
| | Hashing. | |
| | Files and Their Organization: Data Hierarchy, File Attributes. Text Files | |
| | and Binary Files, Basic File Operations, File Organizations and Indexing. | |
| | T 1: Ch 7, Ch 8: 8.1,Ch 9: 9.1, 9.2, 9.3 | |
| | | |

Note 1: All units will have internal choice

Note 2: Three Assignments are evaluated for 5 marks: Assignment – I from Units 1 and 2.

Assignment – II from Units 3 and 4 Assignment -III from Unit 5

Course Outcomes:

After the completion of the course students will be able to

CO1: Implement pointers in memory allocation , data structure functions.

CO2: Classify common data structures and implement them.

CO3: Apply appropriate algorithm for problem solving after identifying the appropriate linear data structure.

CO4: Design efficient programs by choosing the most apt non linear data structure.

5. Robert Kruse, Data Structures and Program Design in C, 2nd Ed, PHI, 1996.

| Sub Title : UNIX AND SHELL PROGRAMMING | | | | | | |
|--|---|------------------------------------|--|--|--|--|
| Sub Code: 18IS33No. of Credits:4= 3: 1 : 0 (L-T-P)No. of Lecture How | | | | | | |
| Exam Duration : 3 hours | Exam Marks: CIE +Assignment + Group Activity + SEE = 40 + 5 +5+ 50 =100 | Total No. of Contact Hours : 52 | | | | |

Course Objectives:

1. Understand and execute the different types of unix command related to file, protection and security.

2. Develop shell programs using command substitution, positional parameters and control structures .

3. Implementation of SED and AWK commands.

4. Develop simple programs using PERL and AWK scripts.

| Unit | Syllabus Content | No of | | |
|------|--|-------|--|--|
| No. | | Hours | | |
| 1 | Introduction. The UNIX operating system, UNIX architecture, Features of UNIX, | 11 | | |
| | Command usage:- locating commands, internal and external commands, Man | | | |
| | Browsing the manual pages, Understanding the man documentation | | | |
| | File system: - the file, what is in a file name?, The parent child relationship ,The | | | |
| | HOME variable: the Home directory, Pwd: checking your current directory,Cd: | | | |
| | changing the current directory Mkdir : making directories, Rmdir: removing | | | |
| | current directories, Absolute pathnames Relative pathnames, Ls :listing directory contents, Unix file system. | | | |
| | Basic file attributes: Ls -l: listing file attributes, the -d option: listing directory | | | |
| | attributes, File ownership, File permission , Chmode: changing file permission | | | |
| | (relative and absolute method), Directory permission, changing file ownership, | | | |
| | chown, chgrp. | | | |
| | The vi editor: Vi basics, three modes of vi editor ,Input mode –entering and | | | |
| | replacing text, Saving text and quitting -the ex mode, Navigation, Editing | | | |
| | text, Undoing last editing instructions, Repeating the last command, Searching for | | | |
| | a pattern substitution. | | | |
| | The shell: The shells interpretive cycle, shell offering, pattern matching. | | | |
| | Escaping and quoting: Redirection: the three standard files,/dev/null and dev/tty: two special files.Pipe. Tee: creating a tee. Command substitution. Shell variables | | | |
| 2 | The process: Process basics, Ps:process status, System process, mechanism of | 11 | | |
| | process creation, Internal and external commands, Process states and Zombies, | | | |
| | Running jobs in background, Nice: job executing with low priority, Killing | | | |
| | processes with signals, Job control, at and batch: execute later, cron: running jobs | | | |
| | periodically, Time: timing processes | | | |
| | Customizing the environment: The shells, Environmental variables, the common | | | |
| | environmental variables, aliases, in-line command editing , The initialization | | | |
| | scripts. | | | |
| | More file attributes: File systems and Inodes, Hard links, Symbolic links and ln, | | | |

| | The directory,Umask: Default file and directory permission, Modification and access times,Find: locating files, Simple filters: The sample database, Pr:printing files,Head: displaying the beginning of a file, Tail: displaying the end of a file,Cut: slitting a file vertically,Paste : pasting files,Sort: ordering a file, Uniq: locate repeated and non repeated lines, Tr:translating characters. | |
|---|--|----|
| 3 | Filters using regular expression: Introduction,grep: searching for a pattern,Basic regular expression(BRE), Extended regular expression(ERE) and egrep,Sed: the stream editor, Line addressing, using multiple instructions,Context addressingWriting selected lines to a file, Text editing,Substitution, basic regular expression Essential shell programming: Shell script, Read: making scripts interactive, Using command line arguments, Exit and exit status of command, Logical operator && and - conditional execution The if conditional, Using test and [] to evaluate expressions, The case conditional, Expr:computation and string handling , \$ 0: calling a script by different names,While: looping, For : looping with a list , Set and shift :manipulating the positional parameter,The header document , Trap :interrupting a program, Debugging shell script with set –x, Sample validation and entry scripts. | 10 |
| 4 | Awk -advanced filter: Simple awk filtering, Splitting a line into fields, Printf: formatting output, Variables and expressions, The comparison operators, Number processing, Variables, The –f option : storing awk programs in a file, The BEGIN and END section, Built in variables, Arrays, functions, Control flow – the if statement, Looping with for, Looping with while | 10 |
| 5 | Perl-the master manipulator: Perl preliminaries, The chop function, Variables and operators, The string handling functions, Specifying filenames in command line, \$-: the default variable, Current line number (\$.) and range operator (), Lists and arrays, Foreach:looping through a list, Split:, join, dec2bin.pl, grep, associative arrays, Regular expressions and substitution, File handling, file tests, subroutines | 10 |

Note 1: All units will have internal choice

Note 2: Three Assignments are evaluated for 5 marks:

Assignment – I from Units 1 and 2.

Assignment – II from Units 3 and 4

Assignment -III from Unit 5

Note 3: Group Activity is evaluated for 5 Marks

Course Outcomes:

After the completion of the above course students will be able to

- **CO1:** Develop simple command level codes for file, process, redirection, piping, protection and security
- **CO2:** Demonstrate the usage of shell using shell positional parameters and command substitution.
- CO3: Demonstrate different types of SED addressing and AWK filtering.
- CO4: Develop PERL programs for string usage, file concept and arrays handling.

Assignment – I from Units 1 and 2.

Assignment – II from Units 3 and 4

Assignment -III from Unit 5

Note 3: Group Activity is evaluated for 5 Marks

Course Outcomes:

After completion of course students will be able to : **CO1:** Assess professional and ethical responsibility of a software engineer.

CO2: Design and develop software system, component, or process to meet desired needs within realistic constraints

CO3: Identify and develop system models to design the software system.

CO4:Recognize and apply the techniques, modern engineering tools necessary for engineering practice

CO5:Demonstrate the knowledge of verification and validation to ensure good quality software

| Sub Title : DATA STRUCTURES WITH C LAB | | | | |
|--|-----------------------------------|-------------------------------|--|--|
| Sub Code:: 18ISL36 | No. of Credits:1=0:0:1 (L-T-P) | No. of lecture hours/week : 2 | | |
| Exam Duration : 3 hours | Exam Marks: CIE + SEE = 50 + 50 = | = 100 | | |

Course Objectives:

1. To understand design and implement the concept of stack using recursive techniques.

2. To Implement the application of stacks in converting an expression from infix to postfix notation and evaluate postfix expressions.

3. Design common data structures and implement linear queue, circular queue, priority queue

4. To understand the importance of implementing data structures like stacks using linked list, queues using linked list, doubly linked lists and circular linked list.

5. To traverse a non linear data structure like a Binary Search Tree.

I. LIST OF PROGRAMS

1 Design develop and implement menu driven C program to perform following set of operations on Stack of integers (using array of maximum size MAX)

i)) Push ii) Pop iii) Display iv) Exit

The program should print appropriate messages for stack overflow, stack underflow, and stack empty.

- 2 Design , develop and implement a program in C to convert and print a given valid parenthesized or parenthesize free infix expression to postfix expression. The expression consists of single character operands and the binary operators + (plus), (minus), * (multiply), / (divide), % (mod) and ^ (power).
- **3** Design , develop and implement a program in C to evaluate a valid suffix/postfix expression using stack. Assume that the suffix/postfix expression is read as a single line consisting of positive single digit operands and binary arithmetic operators. The arithmetic operators are + (add), (subtract), * (multiply) and / (divide), % (mod) and ^ (power) .
- 4 Design develop and implement menu driven C program to perform following set of operations on queue of integers using an array.
 i) Insert ii) Delete iii) Display iv) Exit
 The program should print appropriate messages for queue overflow, queue underflow, and queue empty.
- 5 Design develop and implement menu driven C program to perform following set of operations on circular queue of integers using an array.
 i) Insert ii) Delete iii) Display iv) Exit
 The program should print appropriate messages for circular queue overflow, circular queue underflow, and circular queue empty.

- 6 Design, Develop and Implement a menu driven program in C for the following operations on Singly Linked List (SLL) of Student Data with the fields: USN, Name, Branch, Sem, *PhNo*
 - i.Create a SLL of N Students Data by using front insertion.
 - i.Display the status of SLL and count the number of nodes in it
 - i.Perform Insertion at End of SLL
 - 7.Perform Deletion at End of SLL
 - ⁷.Exit

The program should print appropriate messages for dynamic stack overflow, underflow and empty.

- 7 Design, Develop and Implement a menu driven program in C for the following operations on Singly Linked List (SLL) of Student Data with the fields: USN, Name, Branch, Sem, PhNo
 - i.Create a SLL of N Students Data by using front insertion.
 - i.Display the status of SLL and count the number of nodes in it
 - i.Perform Insertion at End of SLL
 - *r*.Perform Deletion at front end of SLL
 - ⁷.Exit

The program should print appropriate messages for dynamic queue overflow, underflow and empty

- 8 Design, Develop and Implement a menu driven Program in C for the following operations on
 - Doubly Linked List (DLL) of Employee Data with the fields: SSN, Name, Dept,
 - Designation, Sal, PhNo
 - i.Create a DLL of N Employees Data by using end insertion.
 - i.Display the status of DLL and count the number of nodes in it
 - i.Perform Insertion and Deletion at End of DLL
 - ⁷.Perform Insertion and Deletion at Front of DLL
 - '.Exit
- **9** Design, Develop and Implement a menu driven Program in C for the following operations on
 - Binary Search Tree (BST) of Integers .
 - a. Create a BST of N Integers: 6, 9, 5, 2, 8, 15, 24, 14, 7, 8, 5, 2
 - b. Traverse the BST in Inorder, Preorder and Post Order
 - c. Search the BST for a given element (KEY) and report the appropriate message d. Exit
- 10 Design, Develop and Implement a Program in C for the following operations on Singly Circular Linked List (SCLL) with header nodes. Represent and Evaluate a Polynomial:

$$P(x,y,z) = 6 x^{2} y^{2} z - 4 y z^{5} + 3 x^{3} y z + 2 x y^{5} z - 2 x y z^{3}$$

Note: Programs 2, 3, 6, 8, 9, 10 to be conducted with support of Virtual Lab.

Weblink:

https://cse01-iiith.vlabs.ac.in/ https://ds1-iiith.vlabs.ac.in/data-structures-1/

II. OPEN ENDED QUESTIONS

Design and implement a solution to the following in C.

- 1. Design, Develop and Implement a menu driven Program in C for the following array operations.
- i. Creating an array of N Integer Elements
- ii. Display of array Elements with Suitable Headings
- iii. Inserting an Element (ELEM) at a given valid Position (POS)
- iv. Deleting an Element at a given valid Position (POS)
- v. Exit.
- 2. Design, Develop and Implement a Program in C for the following operations on Strings.
- i.Read a main String (STR), a Pattern String (PAT) and a Replace String (REP)
- ii.Perform Pattern Matching Operation: Find and Replace all occurrences of PAT in
- iii.STR with REP if PAT exists in STR. Report suitable messages in case PAT does not exist in STR

3. Design, Develop and Implement a Program in C for the following operations on Singly Circular Linked List (SCLL) with header nodes

i. Represent a Polynomial P(x,y,z)

ii. Find the sum of two polynomials POLY1(x,y,z) and POLY2(x,y,z) and store the result in POLYSUM(x,y,z)

iii. Display the polynomial P(x,y,z)

NOTE:

1. Student is permitted to submit open ended solution to any other open ended question apart from the list above . But it has to be approved by the staff in charge.

2. In the examination each student picks one question from a lot of all 10 questions

Course Outcomes:

After the completion of the above course students will be able to

CO1: Design and develop stack, an application providing solution to convert infix to postfix expression using stack and also design a solution to evaluate postfix expression.

CO2: Implement queues like linear queue, circular queue.

CO3: Design and develop solution to implement the following : singly linked list, stacks using linked list, queues using linked list, doubly linked list and circular linked list.

CO4: Design the solution to traverse a Non linear data structure like a Binary Search Tree.

Sub Title : DIGITAL PRINCIPLES AND LOGIC DESIGN LAB

| Sub Code:18ISL37No. of Credits:1=0:0:1 (L-T-P)No. of lecture hours/we | | |
|---|---------------------------------------|-----|
| Exam Duration : 3 hours | Exam Marks: $CIE + SEE = 50 + 50 = 2$ | 100 |

Course Objectives:

- 1. Acquire basic skills and confidence to design, analyze, and implement circuits involving various digital logic gates.
- 2. To design, implement and analyze combinational logic circuits.
- 3. To design, implement and analyze sequential logic circuits.
- 4. Realization of one, two bit magnitude comparator.
- 5. Simulation and analysis of various logic circuits using VERILOG/VHDL.

I. LIST OF EXPERIMENTS

PART –A

1. Realize full adder using 3-to-8 decoder IC and 4 input NAND gates.

2. Given any 4-variable logic expression simplify using multiplexer IC.

3. Design and implement mod-n (n<8) synchronous up counter using J-K Flip-Flop ICs

4. Design and implement a ring counter using 4-bit shift register.

5. Design and implement an asynchronous counter using decade counter IC to count up from 0 to n (n \leq =9). Display the count value on 7 segment LED display using BCD to 7 segment code converters IC.

PART- B

1. Write VHDL/Verilog code to realize all the logic gates.

2. Given a Boolean expression, simplify it using K-Map .Write Verilog/VHDL code to realize simplified boolean expression.

3. Write the Verilog/VHDL code for a full adder. Simulate and verify it's working.

4. Write VHDL code for full subtractor. Simulate and verify its working.

5. Write the Verilog /VHDL code for an 8:1 multiplexer. Simulate and verify its working.

6. Write Verilog /VHDL code for two bit magnitude comparator.

7. Write the Verilog/VHDL code for D Flip-Flop with positive-edge triggering. Simulate and verify it's working.

8. Write the Verilog/VHDL code for JK flip flop with negative triggering .Simulate and verify it's working.

9. Write the Verilog/VHDL code for switched tail counter. Simulate and verify it's working.

10. Write the Verilog/VHDL code for mod-8 up counter. Simulate and verify it's working.

II. OPEN ENDED QUESTIONs

Students can build their own applications using the digital components either hardware or simulation tools (software tools)

Course Outcomes:

After completion of the course the students will be able to:

CO1: Simplify Boolean expressions and implement optimal Logic circuits.

CO2: Design and realize combinational circuits.

CO3: Design and realize sequential circuits used for variety of applications.

CO4: Apply minimization techniques to design and implement optimized digital circuits.

CO5: Develop HDL programs for combinational and sequential circuits.

| COs | Mapping with POs |

| CO5 | PO1,PO2, PO4,PO5 , PO7 |

NOTE:

1. STUDENT IS PERMITED TO SUBMIT OPEN ENDED SOLUTION TO ANY OTHER OPEN ENDED QUESTION APART FROM THE LIST ABOVE . BUT IT HAS TO BE APPROVED BY THE STAFF IN CHARGE.

2. IN THE EXAMINATION EACH STUDENT PICKS ONE QUESTION FROM PART A AND ONE QUESTION FROM PART B

| | CONSTITUTION OF INDIA & PROFESSIONAL ETHICS | | | | |
|-----------------------------|--|-------------------|--------------------------------|--|--|
| | Subject Code: 18HS31 | No. of Credits: 1 | No of lecture hours per week: | | |
| Added By Govt, of Karyataka | | | 2 Hrs | | |
| | | Exam Marks: 50 | Total No. of lecture hours: 16 | | |
| | Exam Duration: 2 Hrs | | hrs per week | | |

Total Text Objectives:

Constitution of India and professional Ethics taught to the students to enable them an insight into the constitution and enlighten them about the fundamental rights, Protection of rights through enforcement of writs. Functions of judiciary, knowledge and importance of election in democratic country procedure of elections to the post of president, members of parliament and state legislative assembly and the function of Parliament, legislative Assembly and their powers. Professional ethics- The duties and basic responsibilities of engineers towards society and their employer, apply of new ideas and protection of those ideas.

Course Objective

1. The objective of part-I of the syllabus is to know how the Constitution of India was framed and the basic structure of Indian Constitution and the rights given by the Constitution to their Citizens.

2. The objective of part-II.. To inculcate knowledge on election commission in the democratic system. The functions of judiciary in upholding of the Indian Constitution

3. The objective of part-III. Is enlightening them about the system of government adopted in both Central and State and Method of election of representative of Parliament and State Assembly their powers and function and also enlighten them about the term democracy

4. The Objective of part IV. To create awareness on Professional ethics and Human Values

5. The objective of part-V. To inculcate knowledge and exposure on Safety and Risk, Risk Benefit Analysis and have an idea about the Collective Bargaining, Confidentiality, Professional, Employee, Intellectual Property Rights

| 5 | SAFETY, RESPONSIBILITIES AND RIGHTS : Safety and Risk – Assessment of Safety and Risk – Risk Benefit Analysis and Reducing Risk – Respect for Authority – Collective Bargaining – Confidentiality – Conflicts of Interest – Occupational Crime – Professional Rights – Employee Rights – Intellectual Property Rights (IPR) Piracy and plagiarism. | 4 |

Course Outcomes

1. Students come to know that who are all take part in the framing of Indian Constitution and how it was framed, what it contained. The Rights they can enjoy as a citizen of India. Case law gives detailed knowledge to the students about their fundamental rights. Procedure of enforcement of fundamental rights.

2. . Student gets the knowledge about procedure of conducting of election by the election commission, its duties and powers along with powers and functions of judiciary.

3. Student comes to know regarding system of parliamentary form of government .and how the representative of Central and State Government are elected their powers and functions

4. Student comes to know the correct meaning of ethics and their ethical duties and responsibilities and using of honesty in their profession, and the decision making ability.

5. Student gets the knowledge of using the intellectual propert rights and its protection and its application in their profession.

COURSE OBJECTIVES:

1. The lessons under unit 1 is to help students to recognize oneself as an individual being aware of one's knowledge, personality, environment and lifestyle, through different base and measures like SWOC analysis, personal developments.

2. The lessons under this unit make students to understand the importance of soft skills and hard skills and how to think critically and also learn the importance of creative thinking.

3. The lessons under this unit make students to understand the importance of attitude, time, and also learn to manage them.

4. The objective of this unit is to help a student to learn the art of goal setting and being motivated in achieving his goal in spite of all the hardships with different problems along with teamwork, and leadership qualities.

5. The unit 5 aims at teaching the students about importance of handwriting, punctuation marks, spellings, which helps them, improve in writing skills.

|---|---|--|-----|
| | • | PUNCTUATION MARKS | CO5 |
| | • | SPELLING | 005 |
| | • | VISUAL NARRATIVES(Ramayana, Mahabharata, Short Stories, films and advertisements) | |

COURSE OUTCOME:

1. After the completion of this unit students will know about their self assessments and personality that how to handle various situations in a positive way.

2. At the end of this unit student will be able to see how important it is to consider things carefully and from different angles, something one sees, hears, experiences or reads in order to understand it fully. The student will also have understood the importance of soft skills and thinking creatively.

3. After the completion of this unit students will have learnt about attitude and adaptability and also how to deal with problems and stress in the present world.

4. At the end of this unit students will have learnt some simple ways of planning to achieve his dream and also feel enthusiastic about doing something individually and as well in team.

5. After the completion of this unit students writing skills will have improved.

IV SEM

For FOURTH Semester B E (For CS/IS branch only)

| | SUBJECT TITLE: PROBABILITY, STATISTICS & QUEUEING THEOR | | | | | | |
|--|--|---|--------------------------------------|--|----------|--|--|
| A CONTRACTOR OF THE OWNER | Subject Code : 18MA41CS/IS | Number of Credits: 3 = 2 : 1 : 0 (L : T : P) | No per (L= | No of lecture hours per week: 04 (L=2+T=2) | | | |
| The second secon | Exam Duration: 3 Hrs | Exam Marks: CIE +Assignment + Group Activity + SEE = 40 + 5 +5+ 50 =100 | Tot: hou | Fotal No. of lecture nours: 39 | | | |
| Course ob methods ar enable then | Course objectives: To develop analytical capability and to impart knowledge in Statistical methods and Queuing theory and their applications in Engineering and Technology, so as to enable them to apply the same for solving real world problems | | | | | | |
| Unit No. | | Syllabus Content | | No. of | f hours | | |
| | | | | Theory | Tutorial | | |
| 1 | Probabilitydistributions:RecapofRandom0602Variables.Discrete probability distributions- Binomial, Poisson and Geometric distributions;Continuous probability0602distributions-Exponential Mormal and Weibull distributions | | | | | | |
| 2 | Two dimensional Random variables:Joint probability mass0602function,Marginal probability function, conditional0602probability function,Joint density function, marginal density0602function,conditional probability density function, covariance,0602 | | | | | | |
| 3 | Statistical techniques: Curve fitting by method of least squares: $y = ax+b$, $y = ax^2+bx+c$ and $y=ab^x$, Correlation– Karl Pearson's coefficient of correlation, Regression analysis – lines of regression (without proof)- problems. | | | | | | |
| 4 | Random Proces description of rand first order, second Autocorrelation a process. | s: Classification of random process dom process, stationary random process order and Strict-sense stationary process nd Cross-correlation functions, Ergo | ess, 55 – 5ses, odic | 06 | 02 | | |
| 5 | Queuing Theory: Transient and stea system, Steady sta Markov process, Queuing models: M/M/s/ [∞] /FIFO. | Basic characteristics of Queuing mod dy states, Kendall's notation of a Queu te probabilities for Poisson Queue syste Poisson process, birth and death proc Model I- M/M/1/ $^{\infty}$ /FIFO and Model | lels- uing ems, ess, II- | 06 | 02 | | |

Course Outcomes: After the successful completion of the course the students are able to:

CO1: Understand of basic rules of random variables and moments of random variables.

CO2: Create probability functions of transformation of random variables and use these techniques to generate data from various distributions.

CO3: Develop probabilities in joint probability distributions and derive the marginal and conditional distributions of bivariate random variables.

CO4: Apply the concepts of probability theory to discrete time Markov chain and establish the Markovian queuing models.

CO5: Implement a variety of statistical techniques to solve problems of industry standard statistical software.

Course Outcomes (CO) Mapping with Programme Outcomes (PO)

CO1: PO1, PO2 CO2: PO1, PO2 CO3: PO1, PO2 CO4: PO1, PO4 CO5: PO1, PO2

TEXTBOOKS:

1. Kishore S. Trivedi, Probabilty and Statistics with Reliability, Queuing and Computer Science.

2. S D Sharma, Operation research, Tata Mc-Grill.

3. Sundaran Pillai, Probabililty, Statistics and Queuing theory PHI.

REFERENCE BOOKS/Web sources:

1. S.C.Gupta and B.K.Kapur, Fundamentals of Mathematical Statistics.

2. Robert B Cooper, Introduction to queuing theory, 2nd Edition, North Holland.

3. Ivo Adan and Jacques Resing, Queueing Systems, Lecture notes, Netherlands (2015).

4. Arnold O. Allen, Probability, Statistics and Queing theory with computer Science Applications, Academic Press, INC. New York.

QUESTION PAPER PATTERN:

The Semester End Examination (SEE) is for 100 marks.

^{1.} There shall be five full questions (one question for each unit) carrying 20 marks each and all are ^{Compulsory.}

2. There shall be internal choice in all the Units

Note: Three assignments are evaluated for 5 marks.

| Sub Title : MICROCONTROLLER AND EMBEDDED SYSTEMS | | | | | |
|--|---|------------------------------|--|--|--|
| Sub Code: 18IS41 | No. of Credits:3=3 : 0 : 0 (L-T-P) | No.of Lecture Hours/Week: 3 | | | |
| Exam Duration : | Exam Marks: CIE +Assignment + Croup Activity + SEE = | Total No. of Contact Hours : | | | |
| 5 110015 | 40 + 5 + 5 + 50 = 100 | 37 | | | |

Course Objectives:

- 1. Differentiate between microprocessors and microcontrollers.
- 2. Explain the architecture of ARM processor with its instruction set.
- 3. Identify the applicability of the embedded system
- 4. Comprehend the real time operating system used for the embedded system

| 1 | Microprocessors versus Microcontrollers, ARM Embedded Systems: The RISC design philosophy, The ARM Design Philosophy, Embedded System Hardware, Embedded System Software, ARM Processor Fundamentals: Registers, Current Program Status Register, Pipeline, Exceptions, Interrupts, and the Vector Table, Core Extensions T1:Ch 1 - 1.1 to 1.4, Ch 2 - 2.1 to 2.5 | 7 | |
| 2 | Introduction to Arm Instruction Set: Data Processing Instructions, Branch Instructions, Load-Store Instructions, Software Interrupt Instruction, Program Status Register Instructions, Loading Constants,ARMv5E Extensions, Conditional Execution T1: Ch 3-3.1-3.8 | 8 | |
| 3 | Embedded System Components: Embedded Vs General computing system, Classification of Embedded systems, Major applications and purpose of ES. Core of an Embedded System including all types of processor/controller, Memory, Sensors, Actuators, LED, 7 segment LED display, stepper motor, Keyboard, Push button switch, Communication Interface (onboard and external types), Embedded firmware, Other system components. T2: All the Topics from Chapter1 and Chapter2 | 8 | |
| 4 | Embedded System Design Concepts: Characteristics and Quality Attributes of Embedded Systems, Operational and non-operational quality attributes, Embedded Systems-Application and Domain specific, Hardware Software Co-Design and Program Modeling, embedded firmware design and development | 8 | |
| | T2: Chapter-3, Chapter-4, Chapter-7 (Sections 7.1, 7.2 only), Chapter-9 (Sections 9.1, 9.2, 9.3.1, 9.3.2 only) | |
|---|---|---|
| 5 | RTOS and IDE for Embedded System Design: Operating System basics, Types of operating systems, Task, process and threads (Only POSIX Threads with an example program), Thread preemption, Preemptive Task scheduling techniques, Task | 8 |
| | Communication, Task synchronization issues – Racing and Deadlock, Concept of Binary and counting semaphores (Mutex example without any program), How to choose an RTOS, Integration and testing of Embedded hardware and firmware, Embedded system Development Environment – Block diagram (excluding Keil), Disassembler/decompiler, simulator, emulator and debugging techniques | |
| | T2: Chapter-10 (Sections 10.1, 10.2, 10.3, 10.5.2, 10.7, 10.8.1.1, 10.8.1.2, 10.8.2.2, 10.10 only), Chapter 12, Chapter-13 (block diagram before 13.1, 13.3, 13.4, 13.5, 13.6 only) | |

Note 1: All units will have internal choice

Note 2: Three Assignments are evaluated for 5 marks: Assignment – I from Units 1 and 2. Assignment – II from Units 3 and 4 Assignment -III from Unit 5 Note 3: Group Activity is evaluated for 5 Marks

Course Outcomes:

After the completion of the above course students will be able to

CO1: Apply the knowledge gained for Programming ARM for different applications.

CO2:Interface external devices and I/O with ARM microcontroller.

CO3:Interpret the basic hardware components and their selection method based on the characteristics and attributes of an embedded system.

CO4:Develop the hardware /software co-design and firmware design approaches.

CO5:Demonstrate the need of real time operating system for embedded system applications

| Sub Title : OBJECT ORIENTED CONCEPTS LAB | | | | | |
|--|---------------------------------|------------------------------|--|--|--|
| Sub Code:: 18ISL46 | No. of Credits:1= 0:0:1 (L-T-P) | No. of Lecture Hours/Week: 2 | | | |
| Exam Duration : 3 hours | Exam Marks: CIE + SEE = 50 + 50 | = 100 | | | |

Course Objectives:

1. Design programs using classes and objects for java

2. Build programs for automatic initialization of objects and destroy objects that are no longer required through constructors and destructors.

3. Construct applications to provide flexible options for the creation of new definitions for some of the operators.

4. Specifying mechanism of deriving a new class from older classes through inheritance.

5. Implement methods to select appropriate member function during run time.

I. LIST OF PROGRAMS

- 1 Create a class called Studentwith the following details as variables within it.
 - (i) USN
 - (ii) Name
 - (iii) Branch
 - (iv) Phone

Write a Java/c++ program to create nStudent objects and print the USN, Name, Branch, and Phoneof these objects with suitable headings.

2 Design

a . Java/c++ Program to demonstrate Constructor Overloadingand method overloading b. Develop a Java/c++ Program to implementInner class and demonstrate itsAccess Protections.

- 3 Write a Java/c++ program to implement the Stack using arrays. Write Push(), Pop(), and Display() methods to demonstrate its working.
- 4 Design a superclass called Staff with details as StaffId, Name, Phone, Salary. Extend this class by writing three subclasses namely Teaching (domain, publications), Technical (skills), and Contract (period). Write a Java program to read and display at least 3 staff objects of all three categories.
- 5 Write a Java class called Customer to store their name and date_of_birth. The date_of_birth format should be dd/mm/yyyy. Write methods to read customer data as and display as using StringTokenizer class considering the delimiter character as "/".
- 6 Write a Java/c++ program to read two integers a and b. Compute a/b and print, when b is not zero. Raise an exception when b is equal to zero.
- 7 Write a Java program that implements a multi-thread application that has three threads. First thread generates a random integer for every 1 second; second thread computes the square of the number and prints; third thread will print the value of cube of the number.
- 8 Design a JAVA program using Synchronized Threads, which demonstrates Producer Consumer concept.

- 9 Develop JAVA programs which demonstrates utilities of Linked List Class
- 10 Develop JAVA Applet programs which handles Key Board Event

Note: In the examination each student picks one question from a lot of all 10 questions.

II. OPEN ENDED QUESTIONS

Identify the different objects in the following environments and implement different suitable operations

- 1. Banking System
- 2. Library
- 3. Automobile Industry
- 4. Home Appliances
- 5. User Interface design etc

NOTE:

1. STUDENT IS PERMITED TO SUBMIT OPEN ENDED SOLUTION TO ANY OTHER OPEN ENDED QUESTION APART FROM THE LIST ABOVE . BUT IT HAS TO BE APPROVED BY APROVED BY THE STAFF IN CHARGE.

2.IN THE EXAMINATION EACH STUDENT PICKS ONE QUESTION FROM A LOT OF ALL 10 QUESTIONS

Course Outcomes:

After completing the course the students are able to:

CO1:Design programs using classes and objects using JAVA/C++

CO2:Develop programs for automatic initialization of objects and destroy objects that are no longer required.

CO3:Develop applications to provide flexible options for the creation of new definitions for some of the operators.

CO4:Specify mechanism of deriving a new class from older classes through inheritance . **CO5**:Design a program using Templates & Exception Handling.

| Sub Title : DESIGN AND ANALYSIS OF ALGORITHMS LAB | | | | | | |
|---|---|-------|--|--|--|--|
| Sub Code:18ISL47 | Sub Code:18ISL47No. of Credits:1 =0 : 0 : 1 (L-T-P)No. of Lecture Hours/Week: | | | | | |
| Exam Duration : 3 hours | Exam Marks: CIE + SEE = 50 + 50 = | = 100 | | | | |

Course Objectives:

1. To introduce various algorithm design techniques.

2. To design algorithms with specific technique and implement these algorithms using the appropriate technique.

- 3. Enhance written and oral communication skills among students.
- 4. To enhance the skill to debug programs

I. LIST OF PROGRAMS

Implement the following using C/C++:

- 1 Design and implement an algorithm to Sort a given set of elements using DAC merge sort method and determine the time required to sort the elements. Repeat the experiment for different values of n and analyze the time complexity.
- 2 Print all the nodes reachable from a given starting node in a digraph using BFS method.
- 3 Obtain the topological ordering of vertices in a given graph using DFS method/ Source removal method
- 4 From a given vertex in a weighted connected graph, find shortest paths to other vertices using Dijkstra's algorithm.
- 5 Apply Prim's algorithm to undirected graph and obtain minimum cost Spanning Tree.
- 6 Design and implement Heap Sort algorithm to arrange elements in desired order
- 7 Design and implement an algorithm to solve 0/1 Knapsack problem using dynamic programming.
- 8 Design and Implement Floyd's algorithm for the All-Pairs- Shortest-Paths problem.
- 9 Design and implement an algorithm to solve N-Queen's problem using Back Tracking.
- 10 Design and implement Horspool's algorithm.

Note: In the examination each student picks one question from the lot of all 10 questions.

II. OPEN ENDED QUESTIONS

Develop / Simulate Following Game Applications:

- 1. Knapsack
- 2. Spanning Trees
- 3. Sum of Subset
- 4. Travelling Sales Person etc.

NOTE:

1. STUDENT IS PERMITED TO SUBMIT OPEN ENDED SOLUTION TO ANY OTHER OPEN ENDED QUESTION APART FROM THE LIST ABOVE. BUT IT HAS TO BE APPROVED BY THE STAFF IN CHARGE.

2. IN THE EXAMINATION EACH STUDENT PICKS ONE QUESTION FROM A LOT OF ALL 10 QUESTIONS

Course Outcomes:

After the completion of course the student will be able to :

CO1: Design algorithms using different design techniques.

CO2: Implement the algorithms using C/C++.

CO3: Analyze the time complexity of algorithms.

CO4: Design key algorithmic paradigms to solve optimization problems.

| COs | Mapping with POs |

| Add By Out, of Remains | Subject Code: 18HS43 | Mandatory Course | No of lecture hours per | | | | |
| | | | week: 2 Hrs | | | | |
| | | Exam marks: NIL | Total No. of lecture hours: | | | | |
| | Exam Duration: | | 26 hrs per semester | | | | |

COURSE OBJECTIVE:

1. According to the present day requirement, this unit is designed on job seeking topics, adopting a task based approach with activities and worksheets.

2. In this unit students will be taught to prepare project report effectively which is integral part of their academics by making use of referencing skills. And also they will be taught how to write an abstract and will be familiarized with research paper guidelines.

3. The unit 3 aims at preparing the student to face interviews confidently.

4. Under the topics like synonyms, antonyms and homophones students' vocabulary will be enhanced.

5. The lessons under this unit help students' to use idioms and phrases, decoding the analogies and the correct usage of collective nouns

| UNIT | SYLLABUS CONTENT | HRS/CO |

| | ANALOGY | CO5 |
| | COLLECTIVE NOUNS | |

COURSE OUTCOME:

1. After the completion of this unit students will have learnt to make presentations both in formal and informal situations. And also will have learnt the art of resume writing.

2. After the completion of this unit student will have learnt how to do a project report using referencing skills. And also they will have learnt how to write abstract and will have been familiarized with research paper guidelines.

3. This unit will have helped student to communicate with various skills required for job interviews.

4. After the completion of this unit the students will have learnt the strategies of vocabulary.

5. After the completion of this unit student will have learnt to use idioms and phrases in everyday conversation.

Detailed Scheme

ACADEMIC YEAR 2020-2021

Dr. Ambedkar Institute of Technology Bangalore

V - VI (2018-2022 BATCH) (175Credits)

B.E

Department Of Information Science and Engineering

Vision

• To create Dynamic, Resourceful, Adept and Innovative Technical professionals to meet global challenges.

Mission

- To offer state-of-the-art undergraduate, postgraduate and doctoral programmes in the fields of Engineering, Technology and Management.
- To generate new knowledge by engaging faculty and students in research, development and innovation
- To provide strong theoretical foundation to the students, supported by extensive practical training to meet industry requirements.
- To install moral and ethical values with social and professional commitment.

DEPARTMENT VISION AND MISSION

Vision:

• Imparting quality technical education and preparing professionals to meet Information Technological challenges globally.

Mission:

- Prepare highly capable Information Science engineers through best practices.
- Encourage students to pursue higher education for further growth in the learning process and to promote research in the frontier areas of Information Technology.
- Educate students to take up social and professional responsibilities with ethical values for the betterment of the society.

PROGRAMME EDUCATIONAL OBJECTIVES (PEOS)

PEO1: Graduates will have the ability to become successful computing professionals in the area of Information Science and Engineering.

PEO2: Graduates will be equipped to enhance their knowledge through core engineering and latest technological skills to promote lifelong learning.

PEO3: Graduates will be able to take up social, technical and entrepreneurial challenges in inter disciplinary and multi disciplinary fields.

PROGRAM SPECIFIC OBJECTIVES(PSOS)

PSO1:Students should be able to understand, analyze and adopt principles of programming paradigms by using latest technologies such as Cloud computing, Big data analytics, AI ,Machine Learning and IoT based applications for solving real-world problems.

PSO2:Students should be able to acquire and demonstrate the team work, professional ethics, competence and communication skills while developing software products.

PROGRAMME OUTCOMES (POs)

1. Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

2. Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

3. Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

4. Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

5. Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

6. The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

7. Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

8. Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

9. Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

10. Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

11. Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

12. Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change

V SEMESTER

| USTITUTE OF | INTELLECTUAL PROPERTY RIGHTS(2020-21) | | | | | |
|-----------------------------|---------------------------------------|-------------------|-----------------------------|--|--|--|
| | Subject Code: 18HS51 | No. of Credits: 3 | No of lecture hours per | | | |
| | | | week: 3 Hrs | | | |
| Alded By Gevt. of Kervataka | Exam Duration: | Exam Marks: 100 | Total No. of lecture hours: | | | |
| | 3HOURS | | 39hrs | | | |

Course Objective:

1. The main objective of the IPR is to make the students to be aware of their innovative & creative rights & Protection of IPR.

2. To impart knowledge how to obtain & register their inventions & patenting their inventions & knowledge of creative works that can be protected under Copy Right.

3. To create awareness to prevent fraudulent use of Trade Mark& impart knowledge on Registrable Trade Mark, Rights of Registered Proprietor of TM& its protection& to promote creativity& aesthetic aspects being protected under Designs.

4.To inculcate knowledge on Geographical Indication of a product, its origin & its protection under Geographical Indication & Important GIs in India.

5.To enable students to have knowledge of Plagiarism ,Cyber Crimes & their impact on human society,its prevention & punishment under Information Technology.

| Units | Syllabus Content | Hours |
|-------|--|-------|
| 1 | INTRODUCTION: Meaning of property, Origin, Nature, Meaning of Intellectual Property Rights, Importance of human creativity in the present scenario, Provision of IPR under TRIPS and WTO. Kinds of Intellectual property rights—Copy Right, Patent, Trade Mark, Trade Secret and trade dress, Design, Layout Design, Geographical Indication, Plant Varieties and Traditional Knowledge. | 04 |
| 2 | PATENT RIGHTS AND COPY RIGHTS— Origin, Meaning of Patent, Types, Inventions which are not patentable, Registration Procedure, Rights and Duties of Patentee, Assignment and licence ,Register of Patents& Patent Offices,Patent Agent,Government use of Invention, Restoration of lapsed Patents, Surrender and Revocation of Patents, Infringement, Remedies & Penalties. COPY RIGHT—Origin, Definition &Subject matter of Copy Right, Author & Ownership of Copy Right, Rights conferred by Copy Right, Registration procedure, Assignment, Licence& Relinquishment of CopyRight, Term of Copy Right, Infringement, Remedies, Computer Software & Copy Right Protection | 10 |
| 3 | TRADE MARKS— Origin, Meaning & Nature of Trade Marks, Types, Features of Good Trade Mark,Trade Mark Registry & Register of Trade Mark,Registration of Trade Marks,Deceptive Similarity,Assignment & Transmission, Infringement & Remedies, Offences relating to Trade Marks, Passing Off, Penalties. DESIGN- Meaning, Definition, Object, Registration of Design,Rights conferred by Registration, Cancellation of Registration, International convention of design- types and functions,Powers & duties of Controller. | 10 |

| | Semiconductor Integrated circuits and layout design Act-2000. | |
|---|---|----|
| | | |
| 4 | GEOGRAPHICAL INDICATION Introduction, Meaning, Scope of Geographical Indication, Important GIs in India, Protection of GI,Registration of GI, Role & Functions of Registrar of GI,Infringement & Remedies. | 06 |
| 5 | PLAGIARISM- Meaning, Plagiarism with respect to IPR,Salient Features of ITAct 2000,Cyber crimes, Meaning, Types of Cyber Crime, Digital signature, Authorities to issue Digital Signature Certificate, E-Commerce. | 09 |

Course outcomes:

1. The students learn the property rights under IPR, kinds of IPR, their protection of creative & innovative Rights.

2.Students also learn the inventions patentable, their registration , protection & punishment for Infringement& knowledge of creative works, Authors right under Copy Right & its term & Infringement of Copy Right.

3.Students will have the knowledge of Registrable Trade Mark, Rights of Proprietor, Protection & prevention of fraudulent use of Trade Mark & learn aesthetic aspects that can be protected, Registered under Designs.

4. Students will be aware of Geographical Indication of a product , its origin , protection of GI s, Important GIs in India.

5.Students will get knowledge of plagiarism in their innovations which can be questioned legally, knowledge on Digital Signature ,Cyber crime & punishment under Information Technology .

TEXT BOOKS:

1. Intellectual Property Rights and the Law, Gogia Law Agency, by Dr. G.B. Reddy

2. Law relating to Intellectual Property, Universal Law Publishing Co, by Dr. B.L.Wadehra

3. IPR by P. Narayanan

4. Law of Intellectual Property, Asian Law House, Dr.S.R. Myneni.

Sub Title : OPERATING SYSTEMS

| Sub Code: 18IS51 | No. of Credits:3=3 : 0 : 0 (L-T-P) | No. of lecture hours/week :3 |
|-------------------------|---|------------------------------------|
| Exam Duration : 3 hours | Exam Marks: CIE +Assignment + Group Activity + SEE = 40 + 5 + 5+ 50 =100 | Total No. of Contact Hours : 39 |

Course Objectives:

To analyze structure ,management, concepts of process scheduling and multithreading in operating 1. system 2. 3. 4. 5.

- To identify the various methods of causing deadlocks.
- To describe the techniques for main memory management.
- To analyze the file system interface, implementation and disk management.
- To understand the Protection and security concepts in operating system.

| Unit | Svllabus Content | No of |
|------|---|-------|
| No. | | Hours |
| 1 | Introduction: What operating systems do, Computer-System Architecture, Operating System Structure, Operating System Operations, Process Management, Memory Management, Storage Management, Protection and Security. T1: Ch 1: 1.1 to 1.9. System Structures: Operating System Services, User Operating System Interface, System Calls, Types of System Calls, System Programs, Operating System Structure; T1: Ch 2: 2.1 to 2.7. Processes: Process Concept, Process Scheduling, Operations on Processes, Inter process Communication; Multithreaded Programming: Multithreading Models; T1: Ch 3: 3.1 to 3.4 Ch 4: 4.1 to 4.3 | 8 |
| 2 | Process Synchronization: The Critical Section Problem, Peterson"s Solution, Synchronization Hardware, Semaphores, Classic Problems of Synchronization, Monitors, Synchronization Examples; T1: Ch 5: 5.1 to 5.9. CPU Scheduling :Scheduling Criteria , Scheduling Algorithms , Thread Scheduling, Multiple-Processor Scheduling , Real-Time CPU Scheduling ,Operating-System Examples. T1: Ch 6: 6.1 to 6.7. Dead locks: System Model, Deadlock Characterization, Methods for handling Deadlocks, Deadlock Prevention, Deadlock Avoidance and detection, Recovery from Deadlock T1: Ch 7: 7.1 to 7.7. | 8 |
| 3 | Memory Management Strategies: | 8 |
| | Main Memory: Background, Swapping, Contiguous Memory Allocation, | |
| | Segmentation, Paging, Structure of Page Table. | |
| | 11: Ch 8: 8.1 to 8.6. Virtual Mamory Managament: Background, Demand Daging, Conv. on Write, Dage | |
| | vinual Memory Management: Background, Demand Paging, Copy on Write, Page | |

| | Replacement, Allocation of frames, Allocating Kernel Memory. T1: Ch 9: 9.1 to 9.8 | |
|---|--|---|
| 4 | File System: File Concept, Access Methods, Directory Structure, File System Mounting, File Sharing, Protection; T1: Ch 11: 11.1 to 11.6. File-System Implementation: File System Structure, File System Implementation, Directory Implementation, Allocation Methods, Free Space Management, Efficiency and Performance, Recovery. T1: Ch 12: 12.1 to 12.7. Mass storage structures, protection: Mass storage structures; Disk structure; Disk | 8 |
| | attachment, Disk scheduling; Disk management; Swap space management. T1: Ch 10: 10.1 to 10.6 | |
| 5 | Protection and Security: Goals of protection, Principles of protection, Domain of protection, Access matrix, Implementation of access matrix, Access control, Revocation of access rights, Capability-Based systems. T1: Ch 14: 14.1 to 14.8 The Security Problem, Program Threats ,System and Network Threats, Cryptography as a Security Tool , User Authentication, Implementing Security Defenses, Firewalling to Protect Systems and Networks, Computer-Security Classifications T1: Ch 15: 15.1 to 15.8 | 7 |

TEXT BOOK:

Abraham Silberschatz Peter Baer Galvin, Greg Gagne - **Operating System concepts**, 9th edition, Wiley-India, 2012.

1. D.M Dhamdhere – **Operating Systems: A Concept Based Approach**, 2nd Edition, Tata McGraw-Hill, 2002.

- 2. P.C.P. Bhatt **Operating Systems**, 2nd Edition, PHI, 2006.
- 3. Harvey M Deital **Operating Systems** –, 3rd Edition Wesley, 1990.

Note 1: All units will have internal choice

Note 2: Three Assignments are evaluated for 5 marks:

Assignment – I from Units 1 and 2. Assignment – II from Units 3 and 4 Assignment -III from Unit 5

Course Outcomes

After the completion of the course students will be able to

CO1: Analyze the fundamental principles and concepts of operating systems.

CO2: Identify, analyze various synchronization technique, deadlocks.

CO3: Identify, analyze, apply the various algorithms for memory management.

CO4: Analyze issues related to file system, disk management, protection and security.

Note 1: All units will have internal choice Note 2: Three Assignments are evaluated for 5 marks: Assignment – I from Units 1 and 2. Assignment – II from Units 3 and 4. Assignment -III from Unit 5

Course Outcomes:

Students will demonstrate the knowledge and the skills acquired with respect to:

CO1: Design simple web pages using different tags of XHTML and Classify and use different levels of style sheets

CO2 : Validate and provide user functionality using JavaScript

CO3 : Design and develop XML document and use the style sheet to display.

CO4: Design and develop PHP programs to perform database access & session tracking.

CO5: Develop web application projects

| ACID Properties, Transaction and schedules, Concurrent Execution of | |
| Transactions, Lock based concurrency control, performance of locking, | |
| Transaction support in SQL, Introduction to crash recovery, Concurrency control | |
| Introduction to NoSOI and MongoDB: What is $NoSOI ?$ Why | |
| NoSOL? Renefit over RDBMS Types of NoSOL Database and NoSOL | |
| vs SOL Comparison What is MongoDB? Overview of MongoDB | |
| Design Goals for MongoDB Server and Database. MongoDB Tools | |
| MongoDB CRUD Concepts, MongoDB Datatypes | |
| TEXT2 Chapter-16,17 | |
| | Database programming issues and techniques, Embedded SQL, Dynamic SQL. TEXT1 Chapter 4,5,13.1,13.2 DatabaseDesign: Functional Dependencies and Normalization: Informal Design Guidelines for Relation Schemas; Functional Dependencies; Normal Forms Based on Primary Keys; General Definitions of Second and Third Normal Forms; Boyce-Codd Normal Form. Relational Database Schema Design Algorithms and further Dependencies: Properties of Relational Decompositions; Multi valued Dependencies: Properties of Relational Decompositions; Multi valued Dependencies and Fourth Normal Form; Join Dependencies and Fifth Normal Form TEXT1 Chapter15,16 Transaction Management: Overview of Transaction Management: The ACID Properties, Transaction and schedules, Concurrent Execution of Transactions, Lock based concurrency control, performance of locking, Transaction support in SQL,Introduction to crash recovery,Concurrency control Introduction to NoSQL and MongoDB: What is NoSQL? Why NoSQL? Benefit over RDBMS, Types of NoSQL Database, and NoSQL vs. SQL Comparison. What is MongoDB Overview of MongoDB, Design Goals for MongoDB Server and Database, MongoDB Tools, MongoDB CRUD Concepts, MongoDB Datatypes TEXT2 Chapter-16,17 |

Note 1: All units will have internal choice

Note 2: Three Assignments are evaluated for 5 marks:

Assignment – I from Units 1 and 2. Assignment – II from Units 3 and 4. Assignment -III from Unit 5

Course Outcomes:

After completing the course the students are able to:

CO1: Analyze the database concepts, data models and design the ER model for real world applications.

CO2: Design a database schema for database application.

CO3: Develop complex queries using SQL to retrieve the information required from the database.

CO4: Apply normalization techniques to database.

CO5: Analyze the concepts of transaction processing, NoSQL and MongoDB

| Sub. Code:18ISE011 | No. of Credits:3=3 : 0 : 0 (L-T-P) | No. of lecture hours/week : 3 |
| Exam Duration : 3 hours | CIE +Assignment +Group Activity + SEE = 45 + 5 + 50 =100 | Total No. of Contact Hours : 39 |

Course objectives: This course will enable students to:

- Define machine learning and understand about various machine learning applications
- Differenciate supervised, unsupervised and reinforcement learning methods

• Apply decision trees, neural networks, Bayes classifier, Kmeans clustering and knearest neighbour methods for problems in machine learning

| Unit No. | Syllabus Content | No. of Hours |
|-------------|---|-----------------|
| 1 | INTRODUCTION TO MACHINE LEARNING: Introduction; Human learning and types of human learning; What is machine learning?; Types of machine learning; Well-posed learning problems; Designing a learning system; Applications of machine learning; Tools in machine learning; Machine learning activities; Issues in machine learning. CONCEPT LEARNING AND THE GENERAL-TO-SPECIFIC ORDERING: Concept learning task; Concept learning as search; Find-S algorithm; Version spaces and the Candidate-elimination algorithm. Chapter 1: 1.1- 1.8 (T2) , 1.1-1.3 (T1) ; Chapter 2:2.1-2.5 (T1), 2.2 (T2) | 8 |
| 2 | DECISION TREE LEARNING: Decision tree representation; Appropriate problems for decision tree learning; Basic decision tree learning algorithm; Hypothesis space search in decision tree learning; Inductive bias in decision tree learning; Issues in decision tree learning; Chapter 3: 3.2-3.7 (T1) | 8 |
| 3 | LINEAR REGRESSION: Notation (Model); Error term; Least square estimation of parameters. Batch Gradient Descent LOGISTIC REGRESSION: Introduction; The Sigmoid; Learning in logistic regression; Cross-entropy loss function; Batch Gradient Descent Chapter 2: 2.1-2.2 (T3); Chapter 5: 5.1-5.4(T4) | 8 |
| 4 | ARTIFICIAL NEURAL NETWORKS: Introduction; Neural Network representations; Appropriate problems for neural network learning; | 8 |

| | Perceptrons; Back propagation algorithm. BAYESIAN LEARNING-I: Introduction; Bayes theorem; Bayes theorem and concept learning Chapter 4: 4.1-4.4 (Till 4.4.3), 4.5 (T1);Chapter 6: 6.1-6.3(Only 6.3.1) (T1) | |
|---|---|---|
| 5 | BAYESIAN LEARNING-II: Bayes optimal classifier; Naive Bayes classifier; Bayesian belief networks. CLUSTERING: Introduction; K Means clustering Chapter 6: 6.7, 6.9, 6.11 (T1) | 7 |

Note 1: All chapters will have internal choice.

Note 2: Three Assignments are evaluated for 5 marks: Assignment – I from Units 1 and 2. Assignment – II from Units 3 and 4. Assignment -III from Unit 5

Course Outcomes:

After completion of course students will be able to:

CO1: Identify problems of machine learning and it's methods

CO2: Apply apt machine learning stratergy for any given problem

CO3: Design systems that uses appropriate models of machine learning

CO4: Solve problems related to various learning techniques

Note 1: All units will have internal choice

Note 2: Three Assignments are evaluated for 5 marks: Assignment – I from Units 1 and 2. Assignment – II from Units 3 and 4. Assignment -III from Unit 5

Course outcomes:

After completing the course the students are able to:

CO1: Analyze the components, activities and strategies of Information system.

- **CO2:** Apply planning and maintenance strategies to the information systems
- **CO3:** Apply the technologies such as ERP, E-Business and E-Commerce, m-Commerce, wireless networks, mobile computing etc.
- **CO4:** Identify the threats to information security and protect information resources.

CO5: To identify and propose Business/IT Solutions to the addressed problems.

| Sub Title : COMPUTER NETWORKS LAB | | |
|-----------------------------------|---------------------------------|------------------------------|
| Sub Code: 18ISL56 | No. of Credits:1 : 0:0:1(L-T-P) | No. of lecture hours/week :2 |
| Exam Duration : 3 hours | Exam Marks:CIE + SEE = 50 + 50 | =100 |

Course Objectives:

1. Construct sample networks with different topologies and configurations.

2. Analysis of the network behavior with respect to different parameters and conditions.

3. Build programs to implement error detection techniques and congestion control techniques.

4. Construct programs to build optimal routing table.

5. Build programs to implement the specified security algorithms

I. LIST OF PROGRAMS

PART A

The following experiments shall be conducted using either NS2/OPNET/NCTUNS or any other suitable simulator.

1. Simulate a three nodes point - to - point network with duplex links between them. Set the queue size and vary the bandwidth and find the number of packets dropped.

2. Simulate a four node point-to-point network with the links connected as follows:

n0 - n2, n1 - n2 and n2 - n3. Apply TCP agent between n0-n3 and UDP between n1-n3. Apply relevant applications over TCP and UDP agents changing the parameter and determine the number of packets sent by TCP / UDP.

3. Simulate the transmission of ping messages over a network topology consisting of 6 nodes and find the number of packets dropped due to congestion.

4. Implement simple ESS and with transmitting nodes in wireless LAN by simulation and determine the performance with respect to transmission of packets

5. Simulate an Ethernet LAN using n nodes and set multiple traffic nodes and plot congestion window for different source / destination.

PART-B

Implement the following in Java:

1. Write a program for error detecting code using CRC-CCITT (16- bits).

2. Write a program for distance vector algorithm to find suitable path for transmission.

3. Implement Diffie-Hellman Key exchange algorithm.

- 4. Write a program for simple RSA algorithm to encrypt and decrypt the data.
- 5. Write a program for congestion control using leaky bucket algorithm.

II. OPEN ENDED QUESTIONS

Develop/ Simulate the following applications:

- 1. Shortest Path from source to destination
- 2. File Transfer
- 3. Remote Login
- 4. Any other network and/or security application.

5. Using TCP/IP sockets, write a client – server program to make the client send the file name and to make the server send back the contents of the requested file if present.

NOTE:

1.STUDENT IS PERMITED TO SUBMIT OPEN ENDED SOLUTION TO ANY OTHER OPEN ENDED QUESTION APART FROM THE LIST ABOVE . BUT IT HAS TO BE APPROVED BY THE STAFF IN CHARGE.

2. STUDENT IS REQUIRED TO SOLVE ONE PROBLEM FROM PART-A AND ONE PROBLEM FROM PART-B. THE QUESTIONS ARE ALLOTTED BASED ON LOTS. BOTH QUESTIONS CARRY EQUAL MARKS.

Course Outcomes:

After completing the course the students are able to:

CO1: Simulate a sample network on a virtual screen.

CO2: Design and analyze the network behavior against various parameters through simulation

CO3: Demonstrate error detection, routing protocol techniques

CO4: Implement an optimal routing table and apply security algorithms for a given network.

CO5: Demonstrate congestion control techniques.

| Sub Title : DATABASE APPLICATIONS LAB | | |
|---------------------------------------|-----------------------------------|-------------------------------|
| SubCode: 18ISL57 | No. of Credits:1=0: 0 : 1 (L-T-P) | No. of lecture hours/week : 2 |
| Exam Duration : 3 hours | Exam Marks: CIE + SEE = 50 + 50 | =100 |
| | | |

Course Objectives:

1. To execute SQL commands.

2. To implement simple exercises on relational database schema.

3. To design a relational database schema for specific database application using SQL.

4. To apply the normalization procedure on relational database schema

1. Consider the customer-sale scenario given below. The primary keys are underlined and the data types are specified:

CUSTOMER(Cust id : integer, cust_name: string)

ITEM(item_id: integer, item_name: string, price: integer)

SALE(bill_no: integer, bill_data: date, cust_id: integer, item_id: integer, qty_sold: integer) For the above schema, perform the following:

a) Create the tables with the appropriate integrity constraints

b) Insert around 10 records in each of the tables

c) List all the bills for the current date with the customer names and item numbers

d) List the total Bill details with the quantity sold, price of the item and the final amount

e) List the details of the customer who have bought a product which has a price>200

f) Give a count of how many products have been bought by each customer

g) Give a list of products bought by a customer having cust_id as 5

h) List the item details which are sold as of today

i) Create a view which lists out the bill_no, bill_date, cust_id, item_id, price, qty_sold, amount

2 Consider the following schema for a Library Database:

BOOK(Book_id, Title, Publisher_Name, Pub_Year)

BOOK_AUTHORS(Book_id, Author_Name)

PUBLISHER(Name, Address, Phone)

BOOK_COPIES(Book_id, Programme_id, No-of_Copies)

BOOK_LENDING(Book_id, Programme_id, Card_No, Date_Out, Due_Date)

LIBRARY_PROGRAMME(Programme_id, Programme_Name, Address)

Write SQL queries to

a) Retrieve details of all books in the library – id, title, name of publisher, authors, number of copies in each Programme, etc.

b) Get the particulars of borrowers who have borrowed more than 3 books, but from Jan 2019 to Jun 2019

c) Delete a book in BOOK table. Update the contents of other tables to reflect this data manipulation operation.

d) Partition the BOOK table based on year of publication. Demonstrate its working with a simple query.

e) Create a view of all books and its number of copies that are currently available in the Library.

3. Consider the Employee-pay scenario given below. The primary keys are underlined and the data types are specified:

EMPLOYEE(emp_id : integer, emp_name: string)

DEPARTMENT(dept_id: integer, dept_name:string)

PAYDETAILS(emp_id : integer, dept_id: integer, basic: integer, deductions: integer, additions: integer, DOJ: date)

PAYROLL(emp_id : integer, pay_date: date)

For the above schema, perform the following:

a) Create the tables with the appropriate integrity constraints

b) Insert around 10 records in each of the tables

c) List the employee details department wise

d) List all the employee names who joined after particular date

e) List the details of employees whose basic salary is between 10,000 and 20,000

f) Give a count of how many employees are working in each department

g) Give a names of the employees whose netsalary>10,000

h) List the details for an employee_id=5

i) Create a view which lists out the emp_name, department, basic, dedeuctions, netsalary

j) Create a view which lists the emp_name and his netsalary

4. Consider the following relational schema for the Office of the Controller of Examinations Application.

Student (<u>Rollno</u>, Name, Dob, Gender, Doa, Bcode);

Implement a check constraint for Gender

Branch (Bcode, Bname, Dno);

Department (Dno, Dname);

Course (Ccode, Cname, Credits, Dno);

Branch_Course (<u>Bcode</u>, <u>Ccode</u>, Semester);

Enrolls (<u>Rollno</u>, <u>Ccode</u>, <u>Sess</u>, Grade);

For Example, SESS can take values 'MAY2019', 'DEC2019' Implement a check constraint for grade Value Set ('S', 'A', 'B', 'C', 'D', 'E', 'U'); Students are admitted to Branches and they are offered by Departments. A branch is offered by only one department. Each branch has a set of Courses (Subjects). Each student must enroll during a semester. Courses are offered by Departments. A course is offered only by one department. If a student is unsuccessful in a course he/she must enroll for the course during next session. A student has successfully completed a course if the grade obtained by is from the list (A, B, C, D, and E). A student is unsuccessful if he/she have grade 'U' in a course.Develop a SQL query to

- a) list details of Departments that offer more than 3 branches.
- b) list the details of Departments that offer more than 6 courses.
- c) list the details of courses that are common for more than 3 branches.
- d) list students who got 'S' in more than 2 courses during single enrollment.

e) Create a view that will keep track of the roll number, name and number of courses, a student has completed successfully.

5.Consider the schema for Movie Database: ACTOR (Act_id, Act_Name, Act_Gender) DIRECTOR (Dir_id, Dir_Name, Dir_Phone) MOVIES (Mov_id, Mov_Title, Mov_Year, Mov_Lang, Dir_id) MOVIE_CAST (Act_id, Mov_id, Role) RATING (Mov_id, Rev_Stars) Write SQL queries to

a) List the titles of all movies directed by 'Hitchcock'.

b) Find the movie names where one or more actors acted in two or more movies.

c) List all actors who acted in a movie before 2000 and also in a movie after 2015 (use JOIN operation).

d) Find the title of movies and number of stars for each movie that has at least one rating and find the highest number of stars that movie received. Sort the result by movie title.

e) Update rating of all movies directed by 'Steven Spielberg' to 5.

6. Demonstrate the CRUD operations on Mongodb database.

II.OPEN ENDED QUESTIONS

- 1. Develop the Database applications for any of the following:
- 1. customer-sales
- 2. Student Library
- 3. Employee-payroll
- 4. Video Library
- 5. Any Application
- 2. NO SQL Examples

NOTE :

1. THE EXERCISES ARE TO BE SOLVED IN AN RDBMS ENVIRONMENT LIKE ORACLE OR DB2. 2. STUDENT IS PERMITED TO SUBMIT OPEN ENDED SOLUTION TO ANY OTHER OPEN ENDED QUESTION APART FROM THE LIST ABOVE . BUT IT HAS TO BE APPROVED BY THE STAFF IN CHARGE.

3.IN THE EXAMINATION EACH STUDENT PICKS ONE QUESTION FROM A LOT OF ALL 5 QUESTIONS AND STUDENT NEED TO DO EXTRA QUERIES ALSO.

Course Outcomes:

After completing the course the students are able to:

CO1: Apply the underlying concepts of database technologies.

CO2:Design and implement a relational database schema for a given problem-domain using SQL/MongoDb.

CO3: Develop sophisticated queries to extract information from large datasets.

| Sub Title AUTOMATA THEORY AND COMPILER DESIGN | | | | | |
|---|--|-------------------------------|--|--|--|
| Sub Code: 18IS61 | No. of Credits:4=3 : 1 : 0 (L-T-P) | No. of lecture hours/week : 4 | | | |
| Exam Duration : | Exam Duration : Exam Marks: CIE +Assignment + Total No. of Contact Hours | | | | |
| 3 hours | Group Activity + SEE = 40 + 5 +5+ | 52 | | | |
| 50 =100 | | | | | |

Course objectives:

1.Introduce concepts in automata theory and to classify machines by their power to recognize languages.

2.To understand and design deterministic and non-deterministic finite automata, Regular languages.

3. To apply ideas and techniques discussed to various software designs. Recognize phases of compiler with respect to design.

| Unit No. | Syllabus Content | No. of Hours |
|-------------|--|-----------------|
| 1 | Introduction to Finite Automata: Introduction to Finite Automata; The central concepts of Automata theory; Deterministic finite automata; Non-deterministic finite Automata; Finite automata with Epsilon-transitions. Regular expressions and Languages, Properties of Regular Languages: Regular expressions; Finite Automata and Regular Expressions; Minimization of automata T1: Ch 1-Ch 4 | 10 |
| 2 | Context-Free Grammars And Languages: Context free grammars; Writing a Grammar; Parse trees; Ambiguity in grammars. Normal forms for CFGs: Useless symbols, λ-productions, Unit productions, CNF, GNF. T1:Ch 5: 5.1-5.4; Ch 7: 7.1 | 10 |
| 3 | Pushdown Automata: Definition of the Pushdown automata; Acceptance by empty stack and final state methods. Introduction To Turing Machine: The standard Turing machine; Design of Turning machine. T1:Ch 6: 6.1-6.2; Ch 8: 8.2-8.4 | 10 |
| 4 | Introduction, Lexical analysis: Language processors; The structure of a Compiler. Lexical analysis: The Role of Lexical Analyzer. Syntax Analysis – 1: Introduction; Top-down Parsing: Recursive descent parser and Predictive parser. T2: Ch 1, T2: Ch 3, Ch 4: 4.1, 4.3-4.4 | 10 |

| 5 | Syntax Analysis – 2: Bottom-up Parsing; Introduction to LR Parsing: Simple LR parser; More powerful LR parsers(CLR,LALR) Syntax-Directed Translation: Syntax-Directed definitions; Evaluation order for SDDs. | 12 |
|---|--|----|
| | Intermediate Code Generation: Variants of syntax trees; Three-address code. Code Generation: Issues in the design of Code Generator; The Target language; Basic blocks and Flow graphs; Optimization of basic blocks T2: Ch 4: 4.5-4.9 Ch 5: 5.1-5.2; Ch 6: 6.1-6.2; Ch 8: 8.1-8.5 | |

Note 1: All Units will have internal choice.

Note 2: Three Assignments are evaluated for 5 marks: Assignment – I from Units 1 and 2; Assignment – II from Units 3 and 4. Assignment -III from Unit 5

Course Outcomes:

After completion of course students will be able to:

CO1: Analyze concepts in automata theory and classify machines by their power to recognize languages.

CO2: Impart the knowledge of models of computation.

CO3: Design grammar and recognizers for different formal languages.

CO4: Design and solve problems related to Pushdown Automata & Turing Machine.

CO5: Demonstrate the syntax analysis and error correction strategies in Compiler Design.

Note 1: All chapters will have internal choice.

Note 2: Three Assignments are evaluated for 5 marks: Assignment – I from Units 1 and 2. Assignment – II from Units 3 and 4. Assignment - III from Unit 5

Course Outcomes:

After the completion of course, the student will be able to:

CO1: Analyze core concepts and fundamentals of the Cloud Computing.

CO2: Identify systems, protocols and mechanisms to support Cloud Infrastructure.

CO3: Analyze the Software and Hardware necessities for Cloud Computing.

CO4: Develop applications and host on Cloud Environment.

CO5: To manage the Cloud Environment.

| Sub. Title : DIGITAL | IMAGE PROCESSING | |
|----------------------------|--|------------------------------------|
| Sub.Code: 18IS642 | No. of Credits: 3 =3:0:0(L-T-P) | No. of lecture hours/week : 3 |
| Exam Duration : 3 hours | CIE + Assignment+Group activity+SEE = 40+5+5+50=100 | Total No. of Contact Hours : 39 |
| Course objectives: | | · · |

The objectives of the course are :

1. To overview of Digital image processing

2.To gain knowledge of image enhancement.

3.To be aware of image restoration techniques.

4. To acquire knowledge of colour fundamentals and morphological image processing.

| Unit No. | Syllabus | No. of |
|----------|---|--------|
| 1 | Introduction: What is Digital Image Processing, Origins of Digital Image Processing, Examples of fields that use DIP, Fundamental Steps in Digital | Hours |
| | Image Processing, Components of an Image Processing System. Digital Image Fundamentals: Basic Concepts in Sampling and Quantization, Representing Digital Images, Spatial and Gray-level Resolution,Some Basic Relationships Between Pixels, Linear and Nonlinear Operations. | 8 |
| 2 | Image Enhancement in the Spatial Domain: Some Basic Gray Level Transformations, Histogram Processing, Enhancement Using Arithmetic/Logic Operations, Basics of Spatial Filtering, Smoothing Spatial Filters, Sharpening Spatial Filters. Image Enhancement in the Frequency Domain: Introduction to the Fourier Transform and the Frequency Domain, Smoothing frequency-Domain Filters, Sharpening Frequency-Domain Filters, Homomorphic Filtering. | 8 |
| 3 | Image Restoration: A Model of the Image degradation/Restoration process, Noise Models, Restoration in the Presence of Noise Only– Spatial Filtering, Periodic Noise Reduction by Frequency Domain Filtering, Linear, Position-Invariant Degradations, Estimating the Degradation Function, Inverse Filtering, Minimum Mean Square Error (Wiener) Filtering, Constrained Least Square Filtering, Geometric Mean Filter. | 8 |
| 4 | Color Fundamentals: Color Models, Pseudocolor Image Processing, Basics of Full-Color Image Processing, Color Transformations, Smoothing and Sharpening, Color Segmentation,Color Image Compression. Wavelets and Multiresolution Processing: Image Pyramids, Subband coding, The Haar Transform, Multiresolution Expansions, Wavelet Transforms in one Dimension, Fast Wavelet Transform, Wavelet Transforms in Two Dimensions, Wavelet Packets. | 8 |

| 5 | Image Compression: Fundamentals, Image Compression Models, Error- free (Lossless) compression, Lossy Compression Morphological Image Processing: Preliminaries, Dilation and Erosion, | |
|---|---|---|
| | Opening and Closing, The Hit-or-Miss Transformation, Some Basic | 7 |
| | Morphological Algorithms. Image Segmentation: Detection of | |
| | Discontinuities, Edge Linking and Boundary Detection, Thresholding, | |
| | Region-Based Segmentation. | |

Note 1: All units will have internal choice Note 2: Three Assignments are evaluated for 10 marks: Assignment – I from Units 1 and 2. Assignment – II from Units 3 and 4 Assignment - III from Unit 5

Course Outcomes:

At the end of the course, the students will be able to: CO1:understand image processing concepts. CO2: Analyze image enhancement techniques. CO3:Choose image restoration applications. CO4:Identify color fundamentals and its transformations. CO5:Analyze morphological image concepts

| | Concurrency control, Concurrency control based on Timestamp ordering, | |

Note 1: Each unit will have internal choice.

Note 2: Three Assignments are evaluated for 5 marks:

Assignment – I from Units 1 and 2. Assignment – II from Units 3 and 4. Assignment -III from Unit 5

Course Outcomes:

After completing the course the students are able to:

CO1: Analyze the database concepts and data models for real world applications.

CO2: Design a database schema for database application

CO3: Design and apply the queries to the database to meet the user requirements.

CO4: Apply normalization techniques to database .

CO5: Analyze the concepts of transaction processing, Concurrency control

Course Objectives: 1. To create a web page using XHTML 2. To understand Cascading Style Sheets

3. To do data validation and user interaction using JavaScript

| Unit | Syllabus Contont | No of |
|------|---|-------|
| No | Synabus Content | Hours |
| 1 | Fundamentals of web, XHTML – 1: Internet, WWW, Web Browsers, and Web Servers; URLs; MIME; HTTP; Security; The Web Programmers Toolbox. XHTML-1 : Origins and evolution of HTML and XHTML; Basic syntax; Standard XHTML document structure; Basic text markup. XHTML – 2: Images; Hypertext Links; Lists; Tables; Forms; Frames; Syntactic differences between HTML and XHTML. | 8 |
| 2 | CSS: Introduction; Levels of style sheets; Style specification formats; Selector forms; Property value forms; Font properties; List properties; Color; Alignment of text; The Box model; Background images | 9 |
| 3 | Javascript: Overview of JavaScript; Object orientation and JavaScript; General syntactic characteristics; Primitives, operations, and expressions; Screen output and keyboard input; Control statements; Object creation and modification; Arrays; Functions; Constructor; Pattern matching using regular expressions | 8 |
| 4 | Javascript and HTML documents: The Javascript execution environment; The Document Object Model; Element access in Javascript; Events and event handling; Handling events from the Body elements, Button elements, Text box and Password elements; The DOM 2 event model | 7 |
| 5 | Dynamic documents with javascript: Introduction to dynamic documents; Positioning elements; Moving elements; Element visibility; Changing colors and fonts; Dynamic content; Stacking elements; Locating the mouse cursor; Reacting to a mouse click; Slow movement of elements; Dragging and dropping elements | 7 |

Note 1: All Units will have internal choice.

Note 2: Three Assignments are evaluated for 5 marks: Assignment – I from Units 1 and 2. Assignment – II from Units 3 and 4. Assignment -III from Unit 5

Course Outcomes:

After the completion of the above course students will be able to

CO1: Identify and relate the different terms associated with web technologies.

CO2: Design simple web pages using different tags of XHTML.

CO3: Classify and use different levels of style sheets.

CO4: Validate and provide user functionality using JavaScript (client side data).

CO5: Access the different elements using JavaScript and make use pattern matching concepts

| Exam Duration : 3 hours | Exam Marks: CIE +Assignment + Group Activity + SEE = 40 + 5 +5+ 50 =100 | Total No. of Contact Hours : 39 |

Course Objectives:

1. Understand and execute the different types of unix command related to file, protection and security.

2. Develop shell programs using command substitution, positional parameters and control structures .

- 3. Implementation of SED and AWK commands.
- 4. Develop simple programs using PERL and AWK scripts.

| Unit | Syllabus Content | No of |
|------|---|-------|
| No. | · · | Hours |
| 1 | Introduction. The UNIX operating system, UNIX architecture, Features of UNIX, | 8 |
| | Command usage:- locating commands, internal and external commands, Man | |
| | Browsing the manual pages, Understanding the man documentation | |
| | File system: - the file, what is in a file name?, The parent child relationship ,The | |
| | HOME variable: the Home directory, Pwd: checking your current directory,Cd: | |
| | changing the current directory Mkdir : making directories, Rmdir: removing | |
| | current directories, Absolute pathnames Relative pathnames, Ls :listing directory | |
| | contents, Unix file system. | |
| | Basic file attributes: Ls –l: listing file attributes, the –d option: listing directory | |
| | attributes, File ownership, File permission, Chmode: changing file permission | |
| | (relative and absolute method), Directory permission, changing file ownership, | |
| | chown, chgrp. | |
| | The vi editor: Vi basics, three modes of vi editor ,Input mode –entering and | |
| | replacing text, Saving text and quitting -the ex mode, Navigation, Editing | |
| | text, Undoing last editing instructions, Repeating the last command, Searching for | |
| | a pattern substitution. | |
| | The shell: The shells interpretive cycle, shell offering, pattern matching. | |
| | Escaping and quoting: Redirection: the three standard files,/dev/null and dev/tty: | |
| - | two special files, Pipe, Tee: creating a tee, Command substitution, Shell variables | |
| 2 | The process: Process basics, Ps:process status, System process, mechanism of | 8 |
| | process creation, Internal and external commands, Process states and Zombies, | |
| | Running jobs in background, Nice: job executing with low priority, Killing | |
| | processes with signals, Job control, at and batch: execute later, cron: running jobs | |
| | periodically, Time: timing processes | |

| | Customizing the environment: The shells, Environmental variables, the common environmental variables, aliases, in-line command editing, The initialization scripts. More file attributes: File systems and Inodes, Hard links, Symbolic links and ln, The directory, Umask: Default file and directory permission, Modification and access times, Find: locating files, Simple filters: The sample database, Pr:printing files, Head: displaying the beginning of a file, Tail: displaying the end of a file, Cut: slitting a file vertically, Paste : pasting files, Sort: ordering a file, Uniq: locate repeated and non repeated lines, Tr:translating characters. | |
|---|--|---|
| 3 | Filters using regular expression: Introduction,grep : searching for a pattern,Basic regular expression(BRE), Extended regular expression(ERE) and egrep, Sed: the stream editor, Line addressing, using multiple instructions, Context addressing Writing selected lines to a file, Text editing,Substitution, basic regular expression Essential shell programming: Shell script, Read: making scripts interactive, Using command line arguments, Exit and exit status of command, Logical operator && and - conditional execution The if conditional, Using test and [] to evaluate expressions, The case conditional, Expr:computation and string handling , \$ 0: calling a script by different names,While: looping, For : looping with a list , Set and shift :manipulating the positional parameter,The header document , Trap :interrupting a program, Debugging shell script with set –x, Sample validation and entry scripts. | 8 |
| 4 | Awk -advanced filter: Simple awk filtering, Splitting a line into fields, Printf: formatting output, Variables and expressions, The comparison operators, Number processing, Variables, The –f option : storing awk programs in a file, The BEGIN and END section, Built in variables, Arrays, functions, Control flow – the if statement, Looping with for, Looping with while | 8 |
| 5 | Perl-the master manipulator: Perl preliminaries, The chop function, Variables and operators, The string handling functions, Specifying filenames in command line, \$-: the default variable, Current line number (\$.) and range operator (), Lists and arrays, Foreach:looping through a list, Split:, join, dec2bin.pl, grep, associative arrays, Regular expressions and substitution, File handling, file tests, subroutines | 7 |

Note 1: All units will have internal choice

Note 2: Three Assignments are evaluated for 5 marks:

Assignment – I from Units 1 and 2. Assignment – II from Units 3 and 4 Assignment -III from Unit 5

Course Outcomes:

After the completion of the above course students will be able to

CO1: Develop simple command level codes for file, process, redirection, piping, protection and security

CO2: Demonstrate the usage of shell using shell positional parameters and command substitution.

CO3: Demonstrate different types of SED addressing and AWK filtering.

CO4: Develop PERL programs for string usage, file concept and arrays handling.

| Course Objectives : | | | |
| This course will enable students to: | | | |
| 1. | . Define machine learning and understand about various machine learning applications | | |
| 2. | Differentiate supervised, unsupervised and reinforcement learning methods | | |
| 3. | Apply decision trees, neural networks, Bayes classifier, K-means clustering and k-nearest | | |

LIST OF PROGRAMS

PART-A:

Execute the following programs using Google Colab/Anaconda/Jupiter Notebook:

1. Demonstrate the following:

a. Creation of .CSV files

b. insert synthetic data manually into .CSV files

neighbor methods for problems in machine learning

c. uploading of .CSV files from local drive to python environment.

d. uploading of .CSV files from Google drive to python environment.

2. Demonstrate how to generate synthetic datasets(not manual entry) and generate at least 4 features.

3. Demonstrate the working of Find-S algorithm for finding the most specificities hypothesis using appropriate training samples.

4. Implement Candidate Elimination algorithm and display all the consistent hypotheses using appropriate training samples.

5. Create a .CSV file for the datasets containing the following fields(age, income, student, credit_rating, Buys_computer) where Buys_computer is the target attribute and implement ID3 algorithm for the same.

6. Demonstrate the working of XOR gate using Artificial Neural network with Backpropagation method using Tanh activation function.

7. Implement KNN algorithm to classify "iris dataset" using Kaggle or Machine learning repositories.

8. Implement K-means algorithm using suitable dataset from Kaggle repository or any other Machine Learning repositories.

PART-B: Virtual Lab

1.Implementation of AND/OR/NOT Gate using Single Layer Perceptron. 2.Understanding the concepts of Perceptron Learning Rule.

3.Understanding the concepts of Correlation Learning Rule.

Web link for 1,2 and 3:

http://vlabs.iitb.ac.in/vlabs-dev/labs/machine_learning/labs/index.php

4.Neural networks simulation

Web link for 4: https://playground.tensorflow.org/

Course Outcomes:

After completion of course students will be able to:

CO1: Identify problems of machine learning and it's methods

CO2: Apply apt machine learning strategy for any given problem

CO3: Design systems that uses appropriate models of machine learning

CO4: Solve problems related to various learning techniques

| Sub Title : CLOUD COMPUTING LAB | | |
|---------------------------------|-------------------------------------|--------------------------------|
| Sub Code:18ISL66 | No of Credits : 0:0:1(L:T:P) | No. of Lecture Hours/Week : 02 |
| Exam Duration : 3 hours | Exam Marks :CIE +SEE = 50 + 50 =100 | |

Course Objectives:

- 1. To understand the working and usage of different cloud service models.
- 2. To study the basic understanding of Installation and Configuration of Cloud environment.
- 3. To understand the concept of Service Model and its usage in Cloud Computing.
- 4. To learn development of applications using IaaS, PaaS and SaaS.
- 5. Understand how Cloud environment works, for various deployment models.

I. LIST OF PROGRAMS

PART A

CLOUD COMPUTING:

- 1. Demonstrate the working of Google Drive to make spreadsheet and notes.
- 2. Installation, Configuration and working on Dropbox.
- 3. Demonstrate the working in Cloudanywhere to demonstrate different development stacks.
- 4. Demonstrate the working of Google Form to develop event feedback system.
- 5. Create an application in Salesforce.com to maintain product information.

6. Create an application in Salesforce.com to demonstrate master-child relationship on invoice bill.

- 7. Develop a Visual Force Page to demonstrate the working of dependent field.
- 8. Develop a Visual Force Page to demonstrate the working of basic visual components.
- 9. Demonstrate the working in Codenvy to illustrate Provisioning and Scaling of a Website.
- 10. Demonstrate Virtualization using VMware/Hypervisor.

II. OPEN ENDED QUESTIONS

- 1. Installation and Configuration of Cloudsim cloud software.
- 2. Installation and Configuration of OpenStack or any equivalent cloud software.
- 3. Design and implement Cloud based application(mini-project)

NOTE:

1. STUDENT IS PERMITED TO SUBMIT OPEN ENDED SOLUTION TO ANY OTHER OPEN ENDED QUESTION APART FROM THE LIST ABOVE . BUT IT HAS TO BE APPROVED BY THE STAFF IN CHARGE.

2. STUDENT IS REQUIRED TO EXECUTE ONE PROGRAM FROM PART A and ONE PROGRAM FROM PART B .

Course Outcomes:

After the completion of course, the students will be able to:

CO1: Analyze the requirements to setup: Cloud Environment using IaaS Environment

CO2: Develop the ability to solve real-world problems through software development on Cloud Environment.

CO3: Implement, compile, test and run Java/Php/Python programs comprising on PaaS to address a particular software problem.

CO4: Design and develop useful Cloud applications with elegant user interfaces using SaaS.

Detailed Scheme and Syllabus

ACADEMIC YEAR 2020-2021

VII - VIII (2017-2021 BATCH) (200Credits)

Dr. Ambedkar Institute of Technology Bangalore

Department Of Information Science and Engineering

Vision

• To create Dynamic, Resourceful, Adept and Innovative Technical professionals to meet global challenges.

Mission

- To offer state-of-the-art undergraduate, postgraduate and doctoral programmes in the fields of Engineering, Technology and Management.
- To generate new knowledge by engaging faculty and students in research, development and innovation
- To provide strong theoretical foundation to the students, supported by extensive practical training to meet industry requirements.
- To install moral and ethical values with social and professional commitment.

DEPARTMENT VISION AND MISSION

Vision:

• Imparting quality technical education and preparing professionals to meet Information Technological challenges globally.

Mission:

- Prepare highly capable Information Science engineers through best practices.
- Encourage students to pursue higher education for further growth in the learning process and to promote research in the frontier areas of Information Technology.
- Educate students to take up social and professional responsibilities with ethical values for the betterment of the society.

PROGRAMME EDUCATIONAL OBJECTIVES (PEOS)

PEO1: Graduates will have the ability to become successful computing professionals in the area of Information Science and Engineering.

PEO2: Graduates will be equipped to enhance their knowledge through core engineering and latest technological skills to promote lifelong learning.

PEO3: Graduates will be able to take up social, technical and entrepreneurial challenges in inter disciplinary and multi disciplinary fields.

PROGRAM SPECIFIC OBJECTIVES(PSOS)

PSO1:Students should be able to understand, analyze and adopt principles of programming paradigms by using latest technologies such as Cloud computing, Big data analytics, AI ,Machine Learning and IoT based applications for solving real-world problems.

PSO2:Students should be able to acquire and demonstrate the team work, professional ethics, competence and communication skills while developing software products.

PROGRAMME OUTCOMES (POs)

1. Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

2. Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

3. Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

4. Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

5. Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

6. The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

7. Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

8. Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

9. Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

10. Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

11. Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

12. Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change

VII SEMESTER

Sub Title : SOFTWARE ARCHITECTURE

| Sub Code: IS71 | No. of Credits:4=4 : 0 : 0 (L-T-P) | No. of Lecture Hours/Week : 4 |
|----------------------------|---|---------------------------------|
| Exam Duration : 3 hours | Exam Marks :CIE +Assignment + SEE = 45 + 5 + 50 =100 | Total No. of Contact Hours : 52 |
| | | |

Course Objectives:

- 1. Understanding the fundamentals of software architecture.
- 2. Software architecture and quality requirements of a software system
- 3. Fundamental principles and guidelines for software architecture design, architectural styles, patterns, and frameworks.

4. Methods, techniques, and tools for describing software architecture and documenting design rationale.

5. Software architecture design and evaluation processes.

| | : | |
|------|--|-------|
| Unit | Syllabus Content | No of |
| No. | | Hours |
| 1 | Introduction: The Architecture Business Cycle: Where do architectures come from? Software processes and the architecture business cycle; What makes a "good" architecture? What software architecture is and what it is not; Other points of view; Architectural patterns, reference models and reference architectures; Importance of software architecture; Architectural structures and views. Architectural Styles and Case Studies: Architectural styles; Pipes and filters; Data abstraction and object-oriented organization; Event-based, implicit invocation; Layered systems; Repositories; Interpreters; Process control; Other familiar architectures; Heterogeneous architectures. T1:CH:1,CH2 | 12 |
| 2 | Quality: Functionality and architecture; Architecture and quality attributes; System quality attributes; Quality attribute scenarios in practice; Other system quality attributes; Business qualities; Architecture qualities. Achieving Quality: Introducing tactics; Availability tactics; Modifiability tactics; Performance tactics; Security tactics; Testability tactics; Usability tactics; Relationship of tactics to architectural patterns; Architectural patterns and styles. T1:CH4,CH5 | 10 |

| 3 | Architectural Patterns – 1: Introduction; from mud to structure: Layers, Pipes and Filters, Blackboard. Distributed Systems: Broker; Interactive Systems: MVC, Presentation-Abstraction-Control. T1:CH2 | 10 |
|---|--|----|
| 4 | Architectural Patterns – 2: Adaptable Systems: Microkernel; Reflection. Some Design Patterns: Structural decomposition: Whole – Part; Organization of work: Master – Slave; Access Control: Proxy. T2:CH3 | 10 |
| 5 | Designing and Documenting Software Architecture : Architecture in the life cycle; Designing the architecture; Forming the team structure; Creating a skeletal system. Uses of architectural documentation; Views; Choosing the relevant views; Documenting a view; Documentation across views. T1:CH7,CH8 | 10 |

Note 1: All units will have internal choice

Note 2: Three Assignments are evaluated for 5 marks: Assignment – I from Units 1 and 2. Assignment – II from Units 3 and 4 Assignment -III from Unit 5

Course Outcomes:

After the completion of course the student will be able to:

CO1: Argue the importance and role of software architecture in large scale software systems

CO2:Design and motivate software architecture for large scale software systems

CO3:Recognize major software architectural styles, design patterns, and frameworks

CO4:Describe a software architecture using various documentation approaches and architectural

description languages

CO5: Evaluate the coming attractions in software architecture research and practice.

Note 1: All units will have internal choice

Note 2: Three Assignments are evaluated for 5 marks:

Assignment – I from Units 1 and 2. Assignment – II from Units 3 and 4 Assignment -III from Unit 5

Course outcomes:

On successful completion of the course, the student will be able to

CO1: Interpret the impact and challenges posed by IoT networks

CO2: Appraise the role of IoT protocols for efficient network communication

CO3: Deployment of different sensor technologies and Layers to connect the network.

CO4: To Deploy the role of IoT design in various domains of Industry

CO5:Elaborate the need for Data Analytics .

Note 1: All units will have internal choice

Note 2: Three Assignments are evaluated for 5 marks: Assignment – I from Units 1 and 2. Assignment – II from Units 3 and 4 Assignment -III from Unit 5

Course Outcomes:

After completing the course the students are able to:

CO1: Describe Big data and use cases from selected industry domains.

CO2: Discuss about NoSQL Big data management.

CO3: Install, configure, and run Hadoop.

CO4: Perform Mapreduce analytics using Hadoop.

CO5: Use Hadoop related tools such as HBase, MongoDB, Pig ,Spark, Hive for Big Data Analytics.

|----------------------------|---|------------------------------------|--|
| Sub Code:IS741 | No. of Credits:4=4 : 0 : 0 (L-T-P) | No.of Lecture Hours/Week : 4 | |
| Exam Duration : 3 hours | Exam Marks :CIE +Assignment + SEE = 45 + 5 + 50 =100 | Total No. of Contact Hours : 52 | |

Course Objectives:

Understand the internal data structures and extend this knowledge to external data 1. structures.

To examine how data storage technology works. 2.

Acquire the knowledge of storing data on external storage. Acquire the knowledge of file organizations and indexing 3.

4.

| Unit | Syllabus Content | No of |
|------|---|-------|
| No. | | Hours |
| 1 | Overview of Storage and Indexing, Disks and Files : Data on external storage; File organizations and indexing; Index data structures; Comparison of file organizations; Indexes and performance tuning Memory hierarchy; RAID; Disk space management; Buffer manager; Files of records; Page formats and record formats Tree Structured Indexing: Intuition for tree indexes; Indexed sequential access method; B+ trees, Search, Insert, Delete, Duplicates, B+ trees in practice | 12 |
| 2 | Hash-Based Indexing: Static hashing; Extendible hashing, Linear hashing, comparisons Overview of Query Evaluation, External Sorting : The system catalog; Introduction to operator evaluation; Introduction to query optimization; Alternative plans: A motivating example; what a typical optimizer does. When does a DBMS sort data? A simple two-way merge sort; External merge sort | 10 |
| 3 | Evaluating Relational Operators : The Selection operation; General selection conditions; The Projection operation; The Join operation; The Set operations; Aggregate operations; The impact of buffering A Typical Relational Query Optimizer: Translating SQL queries in to Relational Algebra; Estimating the cost of a plan; Relational algebra equivalences; Nested sub-queries | 10 |
| 4 | Physical Database Design: Introduction; Guidelines for index selection, examples; Clustering and indexing; Indexes that enable index-only plans; Tools to assist in index selection; | 10 |
| 5 | More Recent Applications: Mobile databases; Multimedia databases; Geographical Information Systems; Genome data management | 10 |

Note 1: All units will have internal choice

Note 2: Three Assignments are evaluated for 5 marks: Assignment – I from Units 1 and 2. Assignment – II from Units 3 and 4 Assignment -III from Unit 5

Course Outcomes:

After the completion of course, the students will be able to:

CO1: Analyze basic database storage structures and access techniques

CO2: Apply relational algebraic techniques to create queries.

CO3: Evaluate and optimize queries through various techniques .

CO4: Identify issues regarding emerging database technologies.

^{1.} To understand fundamentals of Android OS, and use appropriate tools for Android Application development.

2. To be familiar with managing of application resources to build elegant user interfaces with views, layouts & fragments

3. To design styling, and common design patterns found among applications

4. To understand storing of application data using preferences, files and directories, SQLite, and content providers.

5. Develop, test, debug and publish mobile applications using android Platform.

| UNIT | Syllabus Content | No of |
|------|---|-------|
| No | | Hours |
| 1 | Platform Overview: Introducing Android – History of Mobile Software Development, The Open Handset Alliance, Android Platform Uniqueness, The Android Platform, Setting Up Your Android Development Environment - Configuring Your Development environment, Exploring the Android SDK. Creating first android application - Testing Your Development Environment, Building Your First Android Application. | 10 |
| | Application Basics : Understanding Application Components - Mastering Important Android Terminology, The Application Context, Performing Application Tasks with Activities, Organizing Activity Components with Fragments, Managing Activity Transitions with Intents T1: Ch1, Ch2, Ch3, ch4 | |
| 2 | Application Basics Continued – Defining the Manifest, Managing Application Resources- What Are Resources?, Adding Simple Resource Values in Android Studio, Working with Different Types of Resources, Working with Layouts, Exploring Building Blocks, Positioning with Layouts, Partitioning with Fragments T1: Ch 5, Ch 6, Ch 7, Ch 8, Ch 9 | 12 |
| 3 | Application Design Essentials: Architecting with Patterns-Architecting Your Application's Navigation, Encouraging Action,, Appealing with Style-Styling with Support, Themes and Styles, Colors, Layout, Embracing Material Design-Understanding Material, The Default Material Theme, Designing Compatible Applications -Maximizing Application Compatibility, Designing User Interfaces for Compatibility, Providing Alternative Application Resources, Targeting Tablets and TVs, | 10 |

| | Extending Application to Watches and Cars. | |
|---|---|----|
| | T1: Ch 10, Ch11, Ch12, Ch 13 | |
| 4 | Application Development Essentials: Using Android Preferences- Working with Application Preferences, Finding Preferences Data on the File System, Creating Manageable User Preferences, Auto Backup for Android Applications. | |
| | Accessing Files and Directories: Working with Application Data on a Device, Practicing Good File Management, Understanding Android File Permissions, Working with Files and Directories, | |
| | Saving with SQLite : Working with Databases | |
| | Leveraging Content Providers - Exploring Android's Content Providers, Modifying Content Providers Data, Using Third-Party Content Providers T1: Ch 14,Ch15,Ch16, Ch17 | |
| 5 | Application Delivery Essentials: | 10 |
| | Testing Your Applications - Best Practices in Testing Mobile Applications, Android Application Testing Essentials, More Android Automated Testing Programs and APIs, Distributing Your Applications - Choosing the Right Distribution Model, Packaging Your Application for Publication, Publishing to Google Play, Google Play Staged Rollouts, Publishing to the Google Play Private Channel, Translating Your Application, Publishing Using Other Alternatives, Self-Publishing Your Application. | |
| | T1: Ch 21 and Ch 22 | |

Note 1: All units will have internal choice

Note 2: Three Assignments are evaluated for 5 marks: Assignment – I from Units 1 and 2. Assignment – II from Units 3 and 4.

Assignment -III from Unit 5

Course Outcomes:

After completing the course the students are able to:

CO1: Analyze the fundamentals to build Mobile apps by assessing the basic framework by usage of Android SDK.

CO2: Design Android applications using various resources and built-in classes.

CO3: Apply creative skills in designing and deploying the sophisticated mobile applications.

CO4: Design and deploy Android applications with compelling User Interfaces and databases.

CO5: Develop and publish the Android Application in the global marketplace for download.

| Sub Title : MACHINE LEARNING | | |
|------------------------------|----------------------------------|-------------------------------|
| Sub Code: ISE02 | No. of Credits: 4 =(L:T:P) 4:0:0 | No. of lecture hours/week : 4 |
| Exam Duration : | CIE+ Assignment + SEE = 40+ | Total No. of Contact Hours |
| 3 hours | 5+5=100 | : 52 |
| | | |

Course objectives: This course will enable students to:

• Define machine learning and understand about various machine learning applications

• Differentiate supervised, unsupervised and reinforcement learning methods

• Apply decision trees, neural networks, Bayes classifier, Kmeans clustering and knearest neighbor methods for problems in machine learning.

| Unit No | Syllabus Content | No. Hours | of |
|------------|--|--------------|----|
| 1 | INTRODUCTION TO MACHINE LEARNING: Introduction; Human learning and types of human learning; What is machine learning?; Types of machine learning; Well-posed learning problems; Designing a learning system; Applications of machine learning; Tools in machine learning; Machine learning activities; Issues in machine learning. CONCEPT LEARNING AND THE GENERAL-TO-SPECIFIC ORDERING: Concept learning task; Concept learning as search; Find-S algorithm; Version spaces and the Candidate-elimination algorithm. T2: Ch 1: 1.1-1.8, T1: 1.1-1.3; T1:Ch 2:2.1-2.5, T2: 2.2. | 11 | |
| 2 | DECISION TREE LEARNING: Decision tree representation; Appropriate problems for decision tree learning; Basic decision tree learning algorithm; Hypothesis space search in decision tree learning; Inductive bias in decision tree learning; Issues in decision tree learning; T1:Ch 3: 3.2-3.7. | 11 | |
| 3 | ARTIFICIAL NEURAL NETWORKS: Introduction; Neural Network representations; Appropriate problems for neural network learning; Perceptrons; Backpropagation algorithm. BAYESIAN LEARNING-I: Introduction; Bayes theorem; Bayes theorem and concept learning; T1`:Ch 4: 4.1-4.4 (Only 4.4.1), 4.5 ;T1:Ch 6: 6.1-6.3(Only 6.3.1) | 10 | |
| 4 | BAYESIAN LEARNING-II: Bayes optimal classifier; Naive Bayes classifier; Bayesian belief networks.CLUSTERING: Introduction; Kmeans clustering | 10 | |

| | T1:Ch 6: 6.7, 6.9, 6.11 | |
|---|---|----|
| 5 | INSTANCE BASED LEARNING: Introduction; k-nearest neighbor | 10 |
| | learning | |
| | REINFORCEMENT LEARNING: Introduction; Learning task. | |
| | T1:Ch 8: 8.1-8.3; T1:Ch 13: 13.1-13.3 | |
| | Use Cases: Applications of Reinforcement Learning in Finance, Banking | |

Note 1: All Units will have internal choice.

Note 2: Three Assignments are evaluated for 5 marks:

Assignment – I from Units 1 and 2;

Assignment – II from Units 3 and 4.

Assignment -III from Unit 5

Course Outcomes:

After completion of course students will be able to:

CO1: Analyze concepts in automata theory and classify machines by their power to recognize languages.

CO2: Impart the knowledge of models of computation.

CO3: Design grammar and recognizers for different formal languages.

CO4: Design and solve problems related to Pushdown Automata & Turing Machine.

CO5: Demonstrate the syntax analysis and error correction strategies in Compiler Design.

| COs | Mapping with POs |

Note 1: All chapters will have internal choice.

Note 2: Three Assignments are evaluated for 5 marks:

Assignment – I from Units 1 and 2. Assignment – II from Units 3 and 4. Assignment -III from Unit 5

Course Outcomes:

After completion of course students will be able to:

CO1: Identify problems of machine learning and it's methods

CO2: Apply apt machine learning stratergy for any given problem

CO3: Design systems that uses appropriate models of machine learning

CO4: Solve problems related to various learning techniques

Note 1: All units will have internal choice

Note 2: Three Assignments are evaluated for 5 marks: Assignment – I from Units 1 and 2. Assignment – II from Units 3 and 4 Assignment -III from Unit 5

Course Outcomes:

After the completion of the above course students will be able to

CO1: Demonstrate the understanding and usage of core python scripting elements python constructs, data types.

CO2 : Demonstrate the understanding and usage of functions ,lists, tuples and dictionaries.

CO3: Demonstrate the understanding and usage of modules, packages and regular expressions. **CO4**: Demonstrate usage of object oriented features such as Inheritance, Polymorphism, operator overloading.

CO5: Apply the knowledge of python and use the language scripting elements and constructs to develop threaded and networking applications

Text Books:

| Sub. Title : MOBILE APPLICATION DEVELOPMENT LAB | | |
|---|---------------------------------|--------------------------------|
| Sub Code:ISL75 | No. of Credits : 0:0:1 | No. of lecture hours/week : 03 |
| Exam Duration : 3 hours | CIE + Assignment + SEE = 45 + 5 | + 50 =100 |

- 1. To understand the Mobile Android OS architecture and life cycle.
- 2. To analyze and use appropriate tools for Android Application development.
- 3. To be familiar with managing application resources.
- 4. To build elegant user interfaces with views, layouts & form widgets.
- 5. To understand the usage of Database, Notifications and Clock in Android Apps.

I. LIST OF PROGRAMS

- 1. Develop an android application that uses GUI components, Font and Colors.
- 2. Design an android application that uses Layout Managers and event listeners.
- 3. Develop a native android calculator application.
- 4. Write an application that draws basic graphical primitives on the screen.
- 5. Develop an android application that makes use of databases.
- 6. Implement an android application that implements Multi-threading concept.
- 7. Develop an application to demonstrate the frame-by-frame animation.
- 8. Implement an application that writes data to the SD card.
- 9. Implement an application that creates an alert upon receiving a message.
- 10. Develop an application to display time in Analog Clock and Digital Clock.
- 11. Write a mobile application that creates an alarm clock.
- 12. Design an application for a Hotel to display a Food List by using the concept of Menus.

II.OPEN ENDED QUESTIONS

Develop an android application using Android Studio/ADT Bundle for any one of the following:

- 1. Mobile Based Attendance System.
- 2. Android Campus Recruitment System.
- 3. Android Book Store Project.
- 4. Student Faculty Document Sharing Android Project
- 5. Android Based Feedback System.

NOTE :

1. Students are permitted to submit open ended solutions OR any other open ended question apart from the list above. But it has to be approved by the staff in charge.

2. In the examination each student picks one question from a lot of all 12 questions.

Course Outcomes:

After completing the course the students are able to:

CO1: Analyze the fundamentals of Mobile application development.

CO2: Analyze the problems to build Mobile apps by assessing the basic framework and usage of SDK.

CO3: Design and develop Android applications using various resources and built-in classes.

CO4: Develop the skills in designing and deploying the sophisticated mobile applications.

CO5: Design and deploy Android applications with compelling User Interfaces.

| CO4 | PO6,PO7,PO9,PO11,PO12 |
| CO5 | PO1,PO3,PO4,PO5,PO6,PO7,PO8,PO12 |

| Sub Title : BIG DATA AND ANALYTICS LAB | | | | |
|--|-----------------------------|--------------------------------|--|--|
| Sub Code:ISL76 | No of Credits : 1:0:1.5 | No. of Lecture Hours/Week : 03 | | |
| Exam Duration : 3hours | Exam Marks :CIE +Assignment | + SEE = 45 + 5 + 50 =100 | | |

- 1. To understand the concept of Big data with hands on.
- 2. Understand installation of various Big data tools under Hadoop.
- 3. To apply Hadoop concepts to various applications and NoSQL implementation.

I. LIST OF PROGRAMS

1.Start by reviewing HDFS. You will find that its composition is similar to your local Linux file system. You will use the hadoop fs command when interacting with HDFS.

- a. Review the commands available for the Hadoop Distributed File System:
- b. Copy file foo.txt from local disk to the user's directory in HDFS
- c. Get a directory listing of the user's home directory in HDFS
- d. Get a directory listing of the HDFS root directory
- e. Display the contents of the HDFS file user/fred/bar.txt

2. Start by reviewing HDFS. You will find that its composition is similar to your local Linux file system. You will use the hadoop fs command when interacting with HDFS.

- a. Move that file to the local disk, named as baz.txt
- b. Create a directory called input under the user's home directory
- c. Delete the directory input old and all its contents
- d. Verify the copy by listing the directory contents in HDFS.
- 3. Demonstrate word count on an input file using MapReduce program.
- 4. Using movie ratings data, Develop the queries in Hive for the following-
- a. List all the Users who have rated the movies (Users who have rated at least one movie)
- b. List of all the User with the max, min, average ratings they have given against any movie
- c. List all the Movies with the max, min, average ratings given by any user

5. In this program you will use HiveQL to filter and aggregate click data to build facts about user's movie preferences. The query results will be saved in a staging table used to populate the Oracle Database.

The moveapp_log_json table contains an activity column. Activity states are as follows:

- RATE_MOVIE
- COMPLETED_MOVIE
- PAUSE_MOVIE
- START_MOVIE
- BROWSE_MOVIE
- LIST_MOVIE
- SEARCH_MOVIE
- LOGIN
- LOGOUT
- INCOMPLETE_MOVIE.
- PURCHASE_MOVIE

a. Write a query to select only those clicks which correspond to starting, browsing, completing, or purchasing movies. Use a CASE statement to transform the RECOMMENDED column into integers where 'Y' is 1 and 'N' is 0. Also, ensure GENREID is not null. Only include the first 25 rows.

b. Write a query to select the customer ID, movie ID, recommended state and most recent rating for each movie.

6. The moveapp_log_json table contains an activity column. Activity states are as follows:

- RATE_MOVIE
- COMPLETED_MOVIE
- PAUSE_MOVIE
- START_MOVIE
- BROWSE_MOVIE
- LIST_MOVIE
- SEARCH_MOVIE
- LOGIN
- LOGOUT
- INCOMPLETE_MOVIE.
- a. Load the results of the previous two queries into a staging table. First, create the staging table:
- b. Next, load the results of the queries into the staging table.
- 7. Write R program to:

a. Create two matrices and perform multiplication & division on those matrices.

b. Create a data frame and print the: data frame, structure of data frame and summary of data frame.

c. Create a Bar chart and sketch the Bar chart by taking months as input & plot it against revenue. Also, add legend to the chart that includes regions.

II. OPEN ENDED QUESTIONS

- 1. Installation and Configuration of Hadoop software on stand alone system.
- 2. Installation and Configuration of Hadoop software on Ubuntu cluster system.
- 3. Highest temperature year wise using MapReduce.

NOTE:

1. STUDENT IS PERMITED TO SUBMIT OPEN ENDED SOLUTION TO ANY OTHER OPEN ENDED QUESTION APART FROM THE LIST ABOVE . BUT IT HAS TO BE APPROVED BY THE STAFF IN CHARGE.

^{2.} STUDENT IS REQUIRED TO EXECUTE ONE PROGRAM FROM PART A and ONE PROGRAM FROM PART B .

Course Outcomes:

After the completion of course, the students will be able to:

CO1: Elucidate installation of various Big data tools under Haoop.

CO2: Implement HiveQL statements.

CO3: Differentiate between SQL and NoSQL commands.

1. The main objective of the IPR is to make the students aware of their rights for the protection of their invention done in their project work.

2. To get registration in our country and foreign countries of their invention, designs and thesis or theory written by the students during their project work and for this they must have knowledge of patents, copy right, trademarks, designs and information Technology Act.

3. Further teacher will have to demonstrate with products and ask the student to identify the different types of IPR's.

| units | Syllabus Content | Hours |
|-------|--|--------|
| 1 | INTRODUCTION TO IPR: Meaning of property, Origin, Nature, Meaning of Intellectual Property Rights, Introduction to TRIPS and WTO. Kinds of Intellectual property rights—Copy Right, Patent, Trade Mark, Trade Secret and trade dress, Design, Layout Design, Geographical Indication, Plant Varieties and Traditional Knowledge. | 03 |
| 2 | PATENT RIGHTS AND COPY RIGHTS— Origin, Meaning of Patent, Types, Inventions which are not patentable, Registration Procedure, Rights and Duties of Patentee, Assignment and licence , Restoration of lapsed Patents, Surrender and Revocation of Patents, Infringement, Remedies & Penalties. COPY RIGHT—Origin, Definition & Types of Copy Right, Registration procedure, Assignment & licence, Terms of Copy Right, Piracy, Infringement, Remedies, Copy rights with special reference to software. | 10 |
| 3 | TRADE MARKS — Origin, Meaning & Nature of Trade Marks, Types, Registration of Trade Marks, Domain Names, Infringement & Remedies, Offences relating to Trade Marks, Passing Off, Penalties. | 04 |
| 4 | DESIGN- Meaning, Definition, Object, Registration of Design, Cancellation of Registration, International convention on design, functions of Design. Semiconductor Integrated circuits and layout design Act-2000. | 05 |
| 5 | BASIC TENENTS OF INFORMATION TECHNOLOGY ACT-2000 -Cyber crimes, digital signature and E-Commerce. | 0 4 |

Course outcomes:

• The students once they complete their academic projects, they get awareness of acquiring the patent

- They also learn to have copyright for their innovative works.
- They also get the knowledge of plagiarism in their innovations which can be questioned legally.

TEXT BOOKS:

- 1. Intellectual Property Rights and the Law, Gogia Law Agency, by Dr. G.B. Reddy.
- 2. Law relating to Intellectual Property, Universal Law Publishing Co, by Dr. B.L.Wadehra.
- 3. IPR by P. Narayanan.
- 4. Law of Intellectual Property, Asian Law House, Dr.S.R. Myneni.

| Sub Title : SOFTWARE TESTING | | | | |
|------------------------------|--|-----------------------------------|--|--|

| | | |

Note 1: All units will have internal choice

Note 2: Three Assignments are evaluated for 5 marks: Assignment – I from Units 1 and 2. Assignment – II from Units 3 and 4 Assignment -III from Unit 5

Course Outcomes:

After the completion of course, the students will be able to:

CO1: Apply terms associated with software testing.

CO2:Design various test generation strategies.

CO3: Implement different types of software testing in application development.

CO4:Summarize aspects of functional and non functional testing.

CO5:Apply the usage of test Management and automation in software testing.

1. Architect sensor networks for various application setups

2. Explore the design space and conduct trade-off analysis between performance & resources

3. Devise appropriate data dissemination protocols and model links cost.

4. Determine suitable medium access protocols and radio hardware.

5. Prototype sensor networks using commercial components.

6. Provision quality of service, fault-tolerance, security and other dependability requirements while coping with resource constraints.

|------|--|----------------|--|--|
| 1N0 | Introduction Overview and Applications of Wireless Sensor Networks | 10 | | |
| 1 | Introduction, Overview and Applications of Wireless Sensor Activities | 10 | | |
| | Sensor Networks: Introduction, Background, Range of Applications, | | | |
| | Examples of Category 2 WSN Applications, Examples of Category 1 WSN | | | |
| | Applications, Another Taxonomy of WSN Technology | | | |
| | (Chapter 1: 1.1, 1.2, Chapter2: 2.1-2.6) | | | |
| 2 | Basic Wireless Sensor Technology and Systems: Introduction, Sensor | 10 | | |
| | Node Technology, Sensor Taxonomy, WN Operating Environment, WN | | | |
| | Trends, Wireless Transmission Technology and Systems: Introduction, | | | |
| | Radio Technology Primer, Available Wireless Technologies | | | |
| | (Chapter3: 3.1-3.5, Chapter 4: 4.1-4.3) | 10 | | |
| 3 | MAC and Routing Protocols for Wireless Sensor Networks: Introduction, | 10 | | |
| | Background, Fundamentals of MAC Protocols, MAC Protocols for WSNS, | | | |
| | Douting Protocols for Wireless Sensor Networks: Introduction | | | |
| | Background, Data Dissemination and Gathering, Routing Challenges and | | | |
| | Design Issues in WSNs, Routing Strategies in WSNs. | | | |
| | (Chapter 5: 5.1-5.6, Chapter 6: 6.1-6.5) | | | |
| 4 | Transport Control and Middleware for Wireless Sensor Networks | 10 | | |
| | Traditional Transport Control Protocols, Transport Protocol Design Issues, | | | |
| | Examples of Existing Transport Control Protocols, Performance of Transport | | | |
| | Control Protocols. Middleware for Wireless Sensor Networks: Introduction, | | | |
| | WSN Middleware Principles, Middleware Architecture, Existing Middleware. | | | |
| | (Chapter 7: 7.1-7.4, Chapter 8: 8.1-8.4) | | | |
| 5 | Network Management and Operating System for Wireless Sensor | 12 | | |
| | Networks Introduction, Network Management Requirements, Traditional | | | |
| | Network Management Models, Network Management Design Issues. | | | |

| Operating Systems for Wireless Sensor Networks: Introduction, Operating | |
|---|--|
| System Design Issues, Examples of Operating Systems. | |
| (Chapter 9: 9.1-9.5, Chapter 10: 10.1-10.3) | |

Note 1: All units will have internal choice Note 2: Three Assignments are evaluated for 5 marks: Assignment – I from Units 1 and 2. Assignment – II from Units 3 and 4 Assignment -III from Unit 5

Course Outcomes:

After the completion of the above course students will be able to:

CO1: Develop applications of wireless sensor actuator networks

CO2: Implement the elements of distributed computing and network protocol.

CO3: Explore various hardware, software platforms that exist for sensor networks

TEXT BOOKS:

1. KAZEM SOHRABY, DANIEL MINOLI, TAIEB ZNATI, "Wireless Sensor Networks: Technology, Protocols and Applications:,

2. WILEY, Second Edition (Indian), 2014

| Exam Duration : 3 hours | Exam Marks :CIE +Assignment + SEE = 45 + 5 + 50 =100 | Total No. of Contact Hours : 52 |

- 1. Introduce concepts about communication protocols.
- 2. To understand about protocol specification.
- 3. To introduce students to the concepts of SDL along with testing concepts.

| Unit No | Syllabus Content | No of Hours |
|------------|---|----------------|
| 1 | Introduction:CommunicationSoftware,CommunicationSubsystems,CommunicationProtocolDefinition/Representation,Formal and Informal Protocol DevelopmentMethods,Protocol Engineering Phases.Textbook1:Chapter1-1.1, 1.2, 1.3, 1.4, 1.5, 1.6Image: Chapter1-Image: Chapter1- | 8 |
| 2 | Network Reference Model: Layered Architecture, Network Services and Interfaces, Protocol Functions: Encapsulation, Segmentation, Reassembly, Multiplexing, Addressing, OSI Model Layer Functions, TCP/IP Protocol Suite, Application Protocols. Textbook1:Chapter2 – 2.1, 2.2, 2.3, 2.4, 2.5, 2.7 | 8 |
| 3 | Protocol Specification: Components of specification, Service specification, Communication Service Specification Protocol entity specification: Sender, Receiver and Channel specification, Interface specifications, Interactions, Multimedia specifications, Alternating Bit Protocol Specification, RSVP specification. Textbook1: Chapter3 – 3.1, 3.2, 3.3, 3.4, 3.5, 3.6, 3.7(3.7.1, 3.7.3) | 12 |
| 4 | Protocol Specification Language (SDL): Salient Features. Communication System Description using SDL, Structure of SDL. Data types and communication paths, Examples of SDL based Protocol Specifications: Question and answer protocol, X-on-X-off protocol, Alternating bit protocol, Sliding window protocol specification, TCP protocol specification, SDL based platform for network, OSPF, BGP Multi Protocol Label Switching SDL components. Textbook1: Chapter4 – 4.1(4.1.1, 4.1.2, 4.1.3) | 12 |

| 5 | Protocol Verification / Validation: Protocol Verification using FSM, | 12 |
|---|---|----|
| | ABP Verification, Protocol Design Errors, Deadlocks, Unspecified | |
| | Reception, Non-executable Interactions, State Ambiguities, Protocol | |
| | Validation Approaches: Perturbation Technique, Reachability Analysis, | |
| | Fair Reachability Graphs, Process Algebra based Validation, SDL Based | |
| | Protocol Verification: ABP Verification, Liveness Properties, SDL Based | |
| | Protocol Validation: ABP Validation. | |
| | | |
| | Textbook1: Chapter 5 – 5.1, 5.2 (5.2.1), 5.4 (5.4.1, 5.4.2, 5.4.3, 5.4.4), | |
| | 5.5 (5.5.2, 5.5.3, 5.5.4), 5.6 (5.6.1), 5.7 (5.7.1) | |
| | Protocol Conformance and Performance Testing: Conformance Testing | |
| | Methodology and Framework, Local and Distributed Conformance Test | |
| | Architectures, Test Sequence Generation Methods: T, U, D and W | |
| | methods. | |
| | | |
| | Textbook1: Chapter 6 – 6.3, 6.4 (6.4.1, 6.4.2, 6.4.3), 6.5 (6.5.1, 6.5.2, | |
| | 6.5.3, 6.5.4) | |
| | | |

Note 1: All units will have internal choice

Note 2: Three Assignments are evaluated for 5 marks: Assignment – I from Units 1 and 2. Assignment – II from Units 3 and 4 Assignment -III from Unit 5

Course Outcomes:

After completing the course the students are able to:

CO1: Analyze the theoretical aspects of communication protocols.

CO2: Apply ideas and techniques discussed to various protocol designs.

CO3: Recognize the different protocol specification and understand about SDL.

CO4: Analyze various testing methodologies.

| Sub Title: MACHINE LEARNING | | |
|-----------------------------|---|------------------------------------|
| Sub. Code:IS823 | No. of Credits:4=4 : 0 : 0 (L-T-P) | No. of lecture hours/week : 4 |
| Exam Duration : 3 hours | CIE +Assignment + SEE = 45 + 5 + 50 =100 | Total No. of Contact Hours : 52 |

Course objectives: This course will enable students to:

- Define machine learning and understand about various machine learning applications
- Differenciate supervised, unsupervised and reinforcement learning methods
- Apply decision trees, neural networks, Bayes classifier, Kmeans clustering and knearest neighbour methods for problems in machine learning

| Unit No. | Syllabus Content | No. of Hours |
|-------------|---|-----------------|
| 1 | INTRODUCTION TO MACHINE LEARNING: Introduction; Human learning and types of human learning; What is machine learning?; Types of machine learning; Well-posed learning problems; Designing a learning system; Applications of machine learning; Tools in machine learning; Machine learning activities; Issues in machine learning. | 10 |
| | CONCEPT LEARNING AND THE GENERAL-TO-SPECIFIC ORDERING: Concept learning task; Concept learning as search; Find-S algorithm; Version spaces and the Candidate-elimination algorithm. Chapter 1: 1.1- 1.8 (T2), 1.1-1.3 (T1); Chapter 2:2.1-2.5 (T1), 2.2 (T2) | |
| 2 | DECISION TREE LEARNING: Decision tree representation; Appropriate problems for decision tree learning; Basic decision tree learning algorithm; Hypothesis space search in decision tree learning; Inductive bias in decision tree learning; Issues in decision tree learning; Chapter 3: 3.2-3.7 (T1) | 11 |
| 3 | LINEAR REGRESSION: Notation (Model); Error term; Least square estimation of parameters. Batch Gradient Descent LOGISTIC REGRESSION: Introduction; The Sigmoid; Learning in logistic regression; Cross-entropy loss function; Batch Gradient Descent Chapter 2: 2.1-2.2 (T3) ; Chapter 5: 5.1-5.4(T4) | 11 |
| 4 | ARTIFICIAL NEURAL NETWORKS: Introduction; Neural Network representations; Appropriate problems for neural network learning; Perceptrons; Back propagation algorithm. | 10 |

| | BAYESIAN LEARNING-I: Introduction; Bayes theorem; Bayes theorem and concept learning | |
|---|--|----|
| | Chapter 4: 4.1-4.4 (Till 4.4.3), 4.5 (T1);Chapter 6: 6.1-6.3(Only 6.3.1) (T1) | |
| 5 | BAYESIAN LEARNING-II: Bayes optimal classifier; Naive Bayes classifier; Bayesian belief networks. | 10 |
| | Chapter 6: 6.7, 6.9, 6.11 (T1) | |

Note 1: All chapters will have internal choice. Note 2: Three Assignments are evaluated for 5 marks: Assignment – I from Units 1 and 2. Assignment – II from Units 3 and 4.

Assignment -III from Unit 5

Course Outcomes:

After completion of course students will be able to:

CO1: Identify problems of machine learning and it's methods

CO2: Apply apt machine learning stratergy for any given problem

CO3: Design systems that uses appropriate models of machine learning

CO4: Solve problems related to various learning techniques

- 1. To create a web page using XHTML
- 2. To understand Cascading Style Sheets
- 3. To do data validation and user interaction using JavaScript

| Unit | Syllabus Content | No of |
|------|---|-------|
| 1 | Fundamentals of web, XHTML – 1: Internet, WWW, Web Browsers, and Web Servers; URLs; MIME; HTTP; Security; The Web Programmers Toolbox. XHTML-1 : Origins and evolution of HTML and XHTML; Basic syntax; Standard XHTML document structure; Basic text markup. XHTML – 2: Images; Hypertext Links; Lists; Tables; Forms; Frames; Syntactic differences between HTML and XHTML. | 10 |
| 2 | CSS: Introduction; Levels of style sheets; Style specification formats; Selector forms; Property value forms; Font properties; List properties; Color; Alignment of text; The Box model; Background images | 12 |
| 3 | Javascript: Overview of JavaScript; Object orientation and JavaScript; General syntactic characteristics; Primitives, operations, and expressions; Screen output and keyboard input; Control statements; Object creation and modification; Arrays; Functions; Constructor; Pattern matching using regular expressions | 10 |
| 4 | Javascript and HTML documents: The Javascript execution environment; The Document Object Model; Element access in Javascript; Events and event handling; Handling events from the Body elements, Button elements, Text box and Password elements; The DOM 2 event model | 10 |
| 5 | Dynamic documents with javascript: Introduction to dynamic documents; Positioning elements; Moving elements; Element visibility; Changing colors and fonts; Dynamic content; Stacking elements; Locating the mouse cursor; Reacting to a mouse click; Slow movement of elements; Dragging and dropping elements | 10 |
| Ν | Note 1: Unit 1 & Unit 3 will have internal choice. | |

Note 2: Three Assignments are evaluated for 5 marks:

Assignment – I from Units 1 and 2.

Assignment – II from Units 3 and 4.

Assignment -III from Unit 5

Course Outcomes:

After the completion of the above course students will be able to

CO1: Identify and relate the different terms associated with web technologies.

CO2: Design simple web pages using different tags of XHTML.

CO3: Classify and use different levels of style sheets.

CO4: Validate and provide user functionality using JavaScript (client side data).

CO5: Access the different elements using JavaScript and make use pattern matching concepts

Course Objectives:

- 1. Understand about agent, behavior and structure
- 2. Learn different AI models and search strategies
- 3. Representation of knowledge and reasoning
- 4. Gain knowledge about learning strategies

| Unit No | Syllabus Content | No of Hours |
|------------|---|----------------|
| 1 | What is AI? Intelligent Agents: Agents and environment; Rationality; the nature of environment; the structure of agents. Problem-solving: Problem-solving agents; Example problems | 10 |
| 2 | Knowledge representation issues: Representations and mappings approaches to knowledge representation, Issues in knowledge representation. | 10 |
| 3 | Logical Agents: Knowledge based agents, The Wumpus world, Logic- Propositional logic Propositional theorem proving, Effective propositional model checking, Agents based on propositional logic. Using predicate logic: Representing simple facts in logic | 10 |
| 4 | Resolution, Natural Deduction, Learning: Forms of Learning; Inductive learning; Learning decision trees; Ensemble learning; Computational learning theory | 10 |
| 5 | Statistical learning, Maximum likelihood parameter learning, Bayesian parameter learning, passive reinforcement learning, active reinforcement learning | 12 |

Note 1: All units will have internal choice

Note 2: Three Assignments are evaluated for 5 marks:

Assignment – I from Units 1 and 2.

Assignment – II from Units 3 and 4.

Assignment -III from Unit 5

Course Outcomes:

After the completion of course, the students will be able to:

CO1: Describe the modern view of AI as the study of agents that receive percepts and perform actions.

CO2: Apply AI search Models and Generic search strategies.

CO3: Write Logic for representing Knowledge and Reasoning of AI systems.

CO4: Design different learning algorithms for improving the performance of AI systems.

CO5: Implement projects using different AI learning techniques

Course Objectives:

- 1. To understand Object oriented concepts like data abstraction, encapsulation, etc.
- 2. To solve the real world scenarios using top down approach.
- 3. To understand various Java programming constructs.
- 4. Create animation & events based upon advanced java concepts.

| UNIT | Syllabus Content | No of |
|------|---|-------|
| No | | Hours |
| 1 | Introduction to Java: Java and Java applications; Java Development Kit | 12 |
| | (JDK); Java is interpreted, Byte Code, JVM; Object-oriented | |
| | programming; Simple Java programs. | |
| | Chapter 1: Page 3-16, Chapter 2 : 17-27 | |
| | Data types and other tokens: Boolean variables, int, long, char, operators, | |
| | arrays, white spaces, literals, assigning values; Creating and destroying | |
| | objects; Access specifiers. | |
| | Chapter 2 : 32-34 , Chapter 3 : 35-48 | |
| | Operators and Expressions: Arithmetic Operators, Bitwise operators, | |
| | Relational operators, The Assignment Operator, The.? Operator; | |
| | Operator Precedence; Logical expression; Type casting; Strings | |
| | Chapter 4 : 61- 79 | |
| | Control Statements: Selection statements, iteration statements, Jump | |
| | Statements. | |
| | Chapter 5 : 81-108 | |
| 2 | Classes, Inheritance: Classes: Classes in Java; Declaring a class; Class | 10 |
| | name; Super classes; Constructors; Creating instances of class; Inner | |
| | classes. Inheritance: Simple, multiple, and multilevel inheritance; | |
| | Overriding, overloading. | |
| | Chapter 6: 109-128, Chapter 7: 129-139, 149-154, Chapter 8: 161-186 | |
| 3 | Exception handling: Exception handling in Java. | 10 |
| | Chapter 10 : 213-232 | |
| | The Applet Class: Two types of Applets; Applet basics; Applet | |
| | Architecture; An Applet skeleton; Simple Applet display methods; | |
| | Requesting repainting; Using the Status Window; The HTML APPLET | |
| | tag; Passing parameters to Applets; getDocumentbase() and | |
| | getCodebase(); ApletContext and showDocument(); The AudioClip | |
| | Interface; The AppletStub Interface; Output to the Console. | |
| | Chapter 13 : 747-768 | |
| 1 | | |

| 4 | Multi Threaded Programming,:Multi Threaded Programming: What are threads? How to make the classes threadable; Extending threads; Implementing runnable; Synchronization; Changing state of the thread; Bounded buffer problems, read-write problem, producer-consumer problems | 10 |
|---|--|----|
| | Chapter 11 : 233-261 | |
| 5 | Event Handling: Two event handling mechanisms; The delegation event model; Event classes; Sources of events; Event listener interfaces; Using the delegation event model; Adapter classes; Inner classes. Chapter 24 : 769-796 Swings: Swings: The origins of Swing; Two key Swing features; Components and Containers; The Swing Packages; A simple Swing Application; Create a Swing Applet; Jlabel and ImageIcon; JTextField; The Swing Buttons; JTabbedpane; JScrollPane; JList; JComboBox; JTable. Chapter 31 : 1021-1036 ; Chapter 32 : 1041-1068 | 10 |

Note 1: All units will have internal choice

Note 2: Three Assignments are evaluated for 5 marks: Assignment – I from Units 1 and 2. Assignment – II from Units 3 and 4 Assignment -III from Unit 5

Course Outcomes:

After the completion of course, the students will be able to:

CO1: Solve computational problems using basic constructs like if-else, control structures, array, strings and write java programs .

CO2: Model real world scenario using class diagram.

- **CO3:** Demonstrate communication between 2 objects using sequence diagram. Implement relationships between classes.
- **CO4:** Design and develop programs on exceptions, multithreading and applets, database applications.
